# MP 41.2

| Internal height: | 42 mm     |
|------------------|-----------|
| Internal widths: | 45-600 mm |
| Radii:           | 90-300 mm |
|                  |           |

#### Ideal operating conditions

- Extreme
   accelerations
- Extreme speeds
- Very high additional loads
- Can be opened on both sides
- Aluminium frame bridge in variable
- lengthsFlexible
- internal
- separation

## MP 52.2

| Internal height: | 52 mm      |
|------------------|------------|
| Internal widths: | 45-600 mm  |
| Radii:           | 100-350 mm |
|                  |            |

### Ideal operating conditions

- Extreme
   accelerations
- Extreme speeds
  Very high
- additional
- Can be opened on both sides
- Aluminium

frame bridge in variable lengths • Flexible internal separation • Version with/without bias
