www.topcable.com/topmatic

topmatic

Calculate the most suitable cable for your electronic installations.

Topmatic is a computer software that helps you select the most suitable cross section for your installations. It calculates the maximum voltage drop by using UNE 20460-5-523 Norm as the reference point for current ratings. Topmatic selects the best cable for every installation by calculating its main parameters precisely.

Topmatic software is definitely a useful tool for everyone who is in the electrical industry.

Top Cable

www.topcable.com/ecomatic

ecomatic

Calculate your energy savings in your electrical installations.

The Ecomatic software helps you calculate the energy you can save when choosing a bigger cross section than the one strictly necessary for installation. A bigger cross section of the conductor reduces the resistance of the circuit, hence decreasing the losses from Joule effect and optimizing the yield of the energy that you consume and pay for.

With Ecomatic, you will achieve significant energy savings and will also reduce CO2 emissions, thus protecting the environment. It is a useful tool for engineers, installers, dealers, students, etc.

Continuous EVOLUTION

Top Cable, is an internationally recognized manufacturer of electric cables, and is highly thought of by professional Engineers & Electricians around the world. As a multinational Corporation with offices and warehouse located around the globe, Top Cable is committed to providing the best products and services to our clients worldwide.

Teamwork has always been the key to the success of our company. Our emphasis on human capital investments has made Top Cable one of the leading cable manufacturers in Europe. In conjuction with our research team, we are committed to providing electric cables of the highest standards to our clients on a global scale.

Top Cable is committed to providing the best products and services to our clients worldwide.

Teamwork has always been the key to the success of our company.

Top Cable is one of the leading cable manufacturers in Europe.

QUALITY, a priority in Top Cable

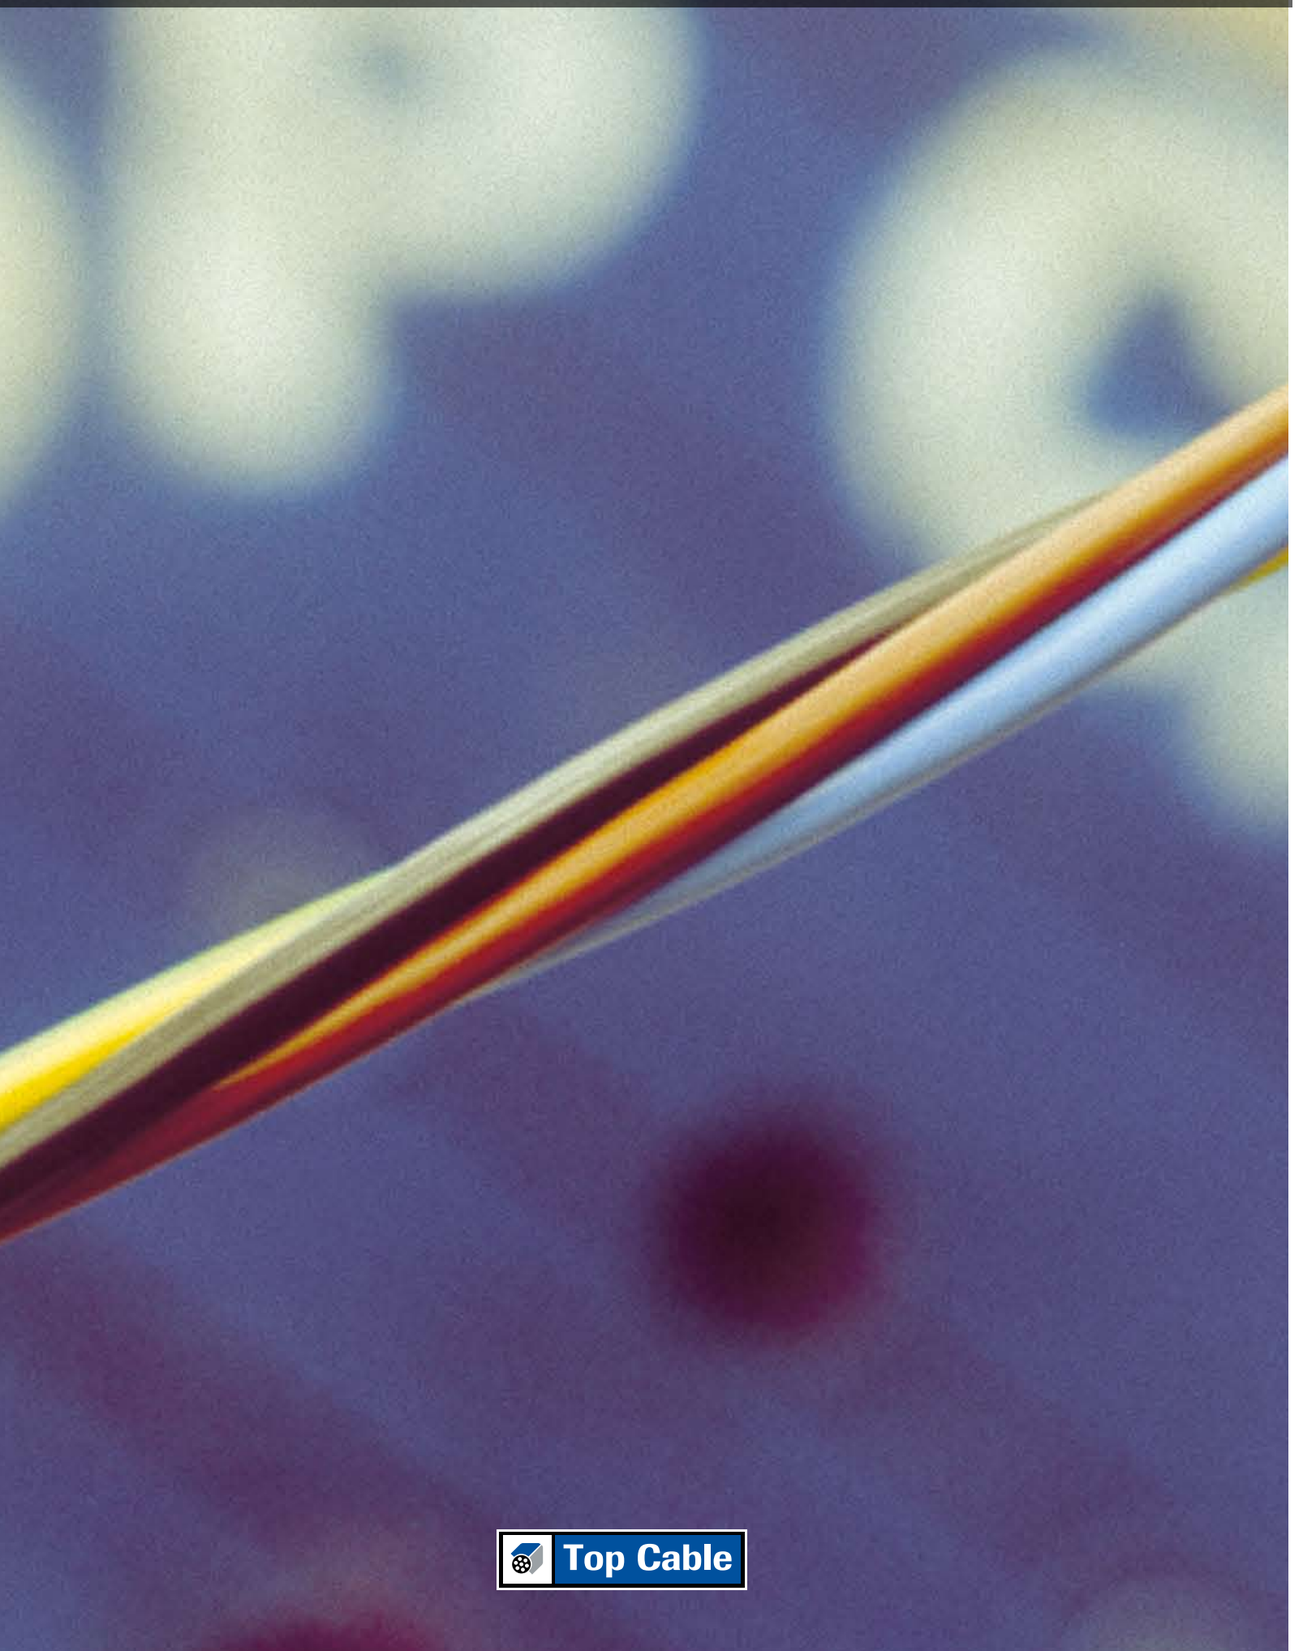
Top Cable's products have passed stringent standards set by both Spanish and European certifying bodies which AENOR guarantee the quality of our products. Our company strongly believes in selecting the best raw materials, adopting rigorous control systems and employing the latest technology in all our production. Our state of the art logistic warehouse in Barcelona (Spain), is one example of our commitment to providing high quality cables and excellent service to all our clients. This initiative has earned us the ISO 9001 award in 1994.

Top Cable as a trademark has become synonymous with quality worldwide.

Our laboratories are equipped to carry out the most rigorous tests.

The company process control systems are guaranteed by internationally recognized Certifying bodies.

An INTEGRATED manufacturing process



Top Cable was started in 1985, and since then has been focusing on investment in technology which sustains advancement through extensive research and development programmes. The aim is to continuosly improve our cables and to ensure a large production capacity that can meet the various demands in the global economy. Our Top Cable Design & Development Centre and research laboratories ware established to provide research work and to identify new areas of improvement that will enable us to constantly provide high performance cables that are suited for multiple applications in various industries.

Being conscious of the importance of optimal costing, our company has opted for the integration of our processes, through focusing each of our production centers into a specialized production unit, while co-ordinating with one another to optimize common resources.

Top Cable submits all its manufacturing processes to the most stringent controls.

Being conscious of the importance of optimal costing, our company has opted for the integration of our processes.

All the centres have R&D teams with their own laboratories capable of designing and producing high quality cables for various applications.

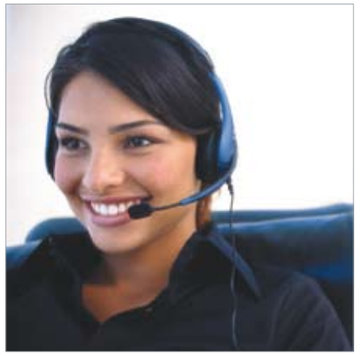
Value Added SERVICE

Our company values all our clients and therefore we adhere to the philosophy of prompt customer service. To further instill the philosophy of value added service, we have invested in a state of the art logistics centre with the latest warehouse management system. This system allows our clients to draw on various cables at any stage to meet their current requirements. This sophisticated infrastructure enables our clients to save on storage, distribution and administration costs.

Selecting the best transport companies for each destination as well as the type of shipment guarantees an extension of our service to destinations further a field. A worldwide computing platform co-ordinates all the logistics activities in real time.

The Top Cable Automated logistic Centre has all the latest WMS (Warehouse Management System) technology.

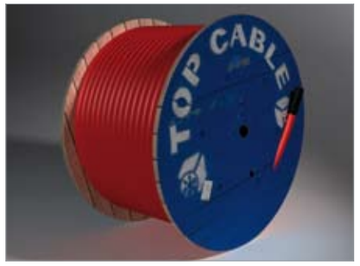
At Top Cable we optimize the way in which we meet our clients requirements by saving them on multiple storage, distribution and administration costs.

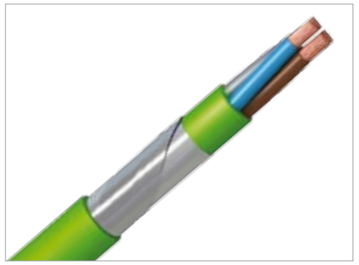


Apart from our attention to detail in regard to logistics, Top Cable's sales teams offer unrivalled attention to the commercial side of the company.

A COMPLETE range

We manufacture a Wide range of cables ranging from control cables for specialized applications to larger power cables for medium voltage applications in various industries. We supply cables for construction projects, railway, mining, marine, areonautical, military, OEM's and renewable energy plants. Conductors can be manufactured in both copper and aluminium with insulating materials varying depending on the application. Every part of the cable is specifically selected and the final product is produced to the highest quality, meeting international standards such as ISO 9002, IEC and CE.





ENVIRONMENTAL
& Corporate Social Responsibilities

We can speak of sales growth, benefits and assets yet this would be irrelevant without a sense of social and environmental responsibility as a company.

Top Cable is committed to protecting the environment. We strongly believe in using environmentally friendly processes in all stages of our production. One of our company's goals is to uphold Sustainable Social Development and seek to educate the public about the importance of keeping our planet green for future generations.

Top Cable is committed to protecting the environment.

The companies that form Top Cable have established recycling systems for the residues produced during the process of producing an electric cable.

Top Cable supports sustainable social development.

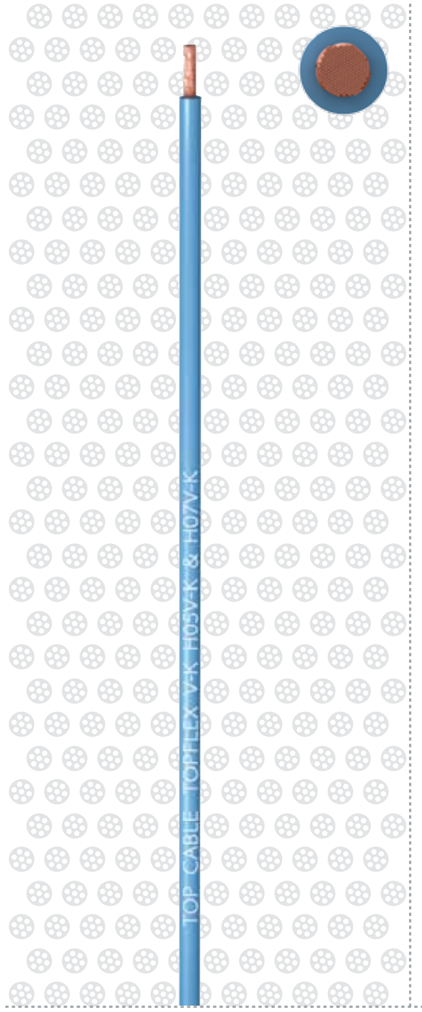
TOPFLEX V-K

H05V-K & H07V-K

Easy and safe Installations.



DESIGN

Conductor

Electrolytic copper, class 5 (flexible), based on EN 60228

Insulation

Extra sliding PVC.

The standard identification is the following:

Blue	RAL 5012	Grey	RAL 7000
Brown	RAL 8003	Dark Blue	RAL 5003
Black	RAL 9005	White	RAL 9010
Red	RAL 3000	Orange	RAL 2003
Yellow/green	RAL 1021 / RAL 6018		

Other colours available upon request

APPLICATIONS

The Topflex H05V-K & H07V-K cable has been specially designed for installations that require a flexible cable due to the complex nature of their layout. This cable is especially suitable for domestic wiring. It may also be used for equipment wiring, distributors, cabinets and lighting. In addition, it is recommended for installation under false ceilings. Cables with cross section, up to 1 mm2 are especially suited for signalling and monitoring installations.

Packaging

Small cross sections (from 0,75 mm2 to 6 mm2) are supplied in high resistant colour boxes (see table below). Medium cross sections (from 10 mm2 to 35 mm2) are supplied in 100 m sealed coils. Cross sections > 35 mm2 are supplied in drums.

BOX COLOUR GUIDE

COLOUR	CROSS SECTION	LENGHT (M) PER BOX
Violet	0,75 mm²	100 m
Green	1 mm²	100 m or 200 m
Red	1,5 mm²	100 m or 200 m
Blue	2,5 mm²	100 m
Brown	4 mm²	100 m
Grey	6 mm²	100 m

CHARACTERISTICS

- Rated Voltage: H05V-K (up to 1 mm2): 300/500 V. H07V-K (from 1,5 mm² owards): 450/750 V.
- Flexible conductor class 5
- Minimum service temperature: -15ºC
- Maximum service temperature:70ºC
- Maximum short-circuit temperature: 160ºC (max. 5 s)
- Minimum bending radius: 5 x cable diameter
- Flame non-propagation
- Water resistance AD3 aspersión
- Chemical & oil resistance: acceptable

INSTALLATION CONDITIONS

- Domestic use
- In conduit
- Electrical panel wiring

National norm / European: EN 60332-1 International norm: IEC 60332-1

TOPFLEX MS

TRI-RATED

The universal cable

DESIGN

Conductor

Electrolytic copper, class 5 (flexible), based on EN60228 and BS 6360.

Insulation

Flexible PVC, high service temperature type TI3 according to UNE 21031/HD 21 and Class 43 UL 1581. The special material used for isolation provides extra sliding properties to the cable.

APPLICATIONS

The Topflex Tri-rated cable has been designed for the internal wiring of electrical cabinets, switch boards and small electrical devices. Due to its manufacturing characteristics, it can be used in conduit or in flexible motor ducts, transformers and other machinery in general.

Packaging

Small cross sections (from 0,75 mm2 to 6 mm2) are supplied in high resistant boxes (see table below). Medium cross sections (from 10 mm2 to 35 mm2) are supplied in 100 m sealed coils. Cross sections > 35 mm2 are supplied in drums.

BOX COLOUR GUIDE

STYLE	CROSS SECTION	PACKAGING
1015	0,75-6 mm²	High resistant boxes
1028	10 mm²	Sealed coils
1283	16-35 mm²	Sealed coils
1284	>50 mm²	Drums

CHARACTERISTICS

- Flexible conductor class 5
- Minimum bending radius: 5 x cable diameter
- Chemical & oil resistance: acceptable
- Minimum service temperature: -40ºC (Fixed and protected installation)
- Meter by meter marking: from 10mm² onwards
- Maximum service temperature 90ºC based on HD and BS, 105ºC based on UL and CSA
- Flame non-propagation VW-1 / FT-2
- Maximum short-circuit temperature: 160ºC (max. 5 s)
- Water resistance AD3 aspersión

INSTALLATION CONDITIONS

- In conduit
- Electrical panel wiring

National norm / European: EN 60332-1 International norm: IEC 60332-1 / UL 2556

Top Cable

LOW VOLTAGE 300/500 V

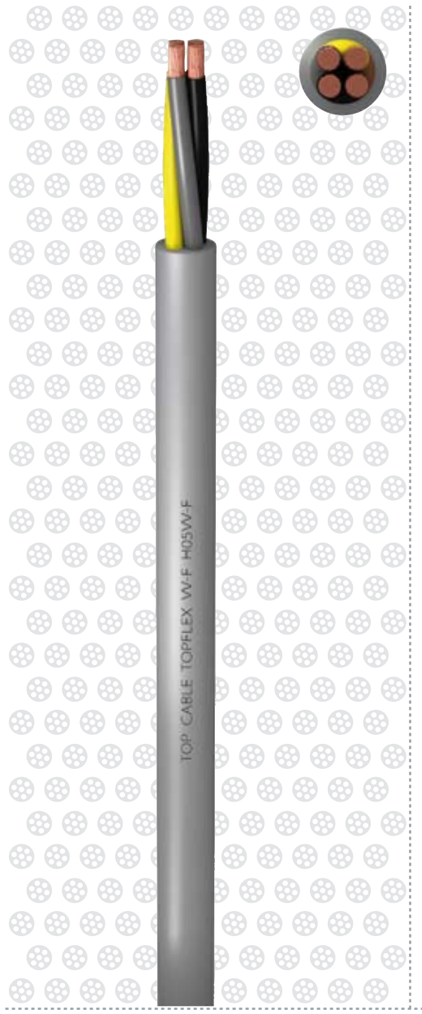
Based on: HD 21.5 / UNE 21031-5

HAR · AENOR · RoHS compliant

TOPFLEX VV-F

H05VV-F

Flexible connection for interiors.



DESIGN

Conductor

Electrolytic copper, class 5 (flexible), based on EN 60228

Insulation

PVC.

The standard identification is the following

2x	Brown + Blue
3G	Brown + Blue + Yellow/green
4G	Brown + Black + Grey + Yellow/green
5G	Brown + Black + Grey + Blue + Yellow/green

Outer sheath

Flexible PVC. Standard colours are Grey, white and Black. Other colours available upon request.

APPLICATIONS

The multicore Topflex VV-F H05VV-F cable has been specially designed for connecting small home appliances such as vacuum cleaners, washing machines, refrigerators, etc. It is recommended for household installations and can also be used for light mobile services.

Packaging

Available in rolls (lengths of 50 and 100 m) and coils.

CHARACTERISTICS

- Flexible conductor class 5
- Minimum bending radius:3&4x cable diameter
- Outdor installation: permanent
- Minimum service temperature: 5ºC
- Meter by meter marking
- Water resistance AD5 water jet
- Maximum service temperature 60ºC
- Flame non-propagation
- Chemical & oil resistance: good
- Maximum short-circuit temperature: 150ºC (max. 5 s)
- Impact resistance: AG1 weak impact

INSTALLATION CONDITIONS

- Domestic use
- In conduit
- Light mobile service
- Domestic appliances
- Open air

National Norm / European: EN 60332-1 International norm: IEC 60332-1

Top Cable

LOW VOLTAGE 450/750 V

Based on: HD 22.4 / UNE 21027-4

HAR · AENOR · RoHS compliant

XTREM

H07RN-F

Power and flexibility to the limit.

DESIGN

Conductor

Electrolytic copper, class 5 or 6 (flexible), based on EN 60228

Insulation

Thermosetting rubber (type EI4).

The standard identification is the following:

1 x ..... natural
2 x ..... Brown + Blue
3 G ..... Brown + Blue + Yellow/green
4 G ..... Brown + Black + Grey + Yellow/green
5 G ..... Brown + Black + Grey + Blue + Yellow/green
6 G or more ..... Black numbered + Yellow/Green

Outer sheath

Thermosetting rubber (type EM2). Black colour.

APPLICATIONS

Top Cable H07RN-F cables are designed to supply power to low voltage appliances including electric motors and submersible pumps in deep water installations as well as many other types of electrical equipment. Thanks to its extraordinary flexibility and mechanical strength, the Xtrem H07RN-F cable is ideal for power transmission in both fixed instalation or mobile service. The cable has been manufactured using compounds which have much better behaviour than the ones specified in the standards. This fact makes the Xtrem H07RN-F cable a multipurpose one. Nominal voltage up to 1000 V possible thanks to the high dielectric properties of the insulation material (according to HD 516).

Pakaging

Available in rolls
(lengths of 50 and 100 m) and coils.

CHARACTERISTICS

- Flexible conductor, class 5/6
- Minimum bending radius 3&4 cable diameter
- Outdoor installation: permanent
- Grease & mineral oils resistance: excellent
- Minimum service temperature: -25ºC
- Meter by meter marking
- Water resistance AD8 submerged
- Abrasion resistance: excellent
- Maximum service temperature 90ºC
- Flame non-propagation
- Chemical & Oil resistance: excellent
- Anti-twist resistant: excellent
- Maximum short-circuit temperature: 250ºC (max. 5 s)
- Impact resistance AG2 medium impact
- Low temperature resistance: excellent (-25ºC)
- Submersible pumps

INSTALLATION CONDITIONS

- Industrial use
- Robotics
- Industrial mobile use
- Open air
- Heavy mobile use
- Submerged
- Windmills
- Deep wells

XTREM

DN-F

The 1.000 V rubber cable for heavy duty

DESIGN

Conductor

Electrolytic copper, class 5 or 6 (flexible), based on EN 60228

Insulation

Thermosetting Rubber (type EPR).

The standard identification is the following

1 x ..... natural
2 x ..... Brown + Blue
3 G ..... Brown + Blue + Yellow/green
4 G ..... Brown + Black + Grey + Yellow/green
5 G ..... Brown + Black + Grey + Blue + Yellow/green

Outer sheath

Thermosetting rubber (type SE1) Black colour.

APPLICATIONS

Flexible cable for mobile heavy duty. Suitable for installations in dry, damp or wet locations, outdoors, machines in industrial workshops, motors and transportable machines; on construction sites and for agricultural exploitations. Suitable for submerged installations (AD8) and for supplying power to low voltage appliances including electric motors and submersible pumps in deep water installations as well many other types of electrical equipment.

CHARACTERISTICS

- Flexible conductor class 5/6
- Minimum bending radius 3x cable diameter
- Outdoor installation: permanent
- Abrasion resistance: excellent
- Minimum service temperature: -25ºC
- Meter by meter marking
- Water resistance AD8 submerged
- Anti-twist resistant: excellent
- Maximum service temperature 90ºC
- Flame non-propagation
- Chemical & Oil resistance: permanent
- Maximum short-circuit temperature: 250ºC (max. 5 s)
- Impact resistance AG2 medium impact
- Grease & mineral oils resistance: excellent

INSTALLATION CONDITIONS

- Industrial use
- Open air
- Industrial mobile use
- Submerged
- Heavy mobile use
- Submersible pumps
- Windmills
- Deep wells

XTREM

DN-K

The 1.000 V rubber cable for fixed installations

DESIGN

Conductor

Electrolytic copper, class 5 (flexible), based on EN 60228

Insulation

Thermosetting rubber (type EPR) Natural colour

Outer sheath

Thermosetting rubber (type SE1) Black colour.

APPLICATIONS

Flexible cable for fi xed installations. Suitable for transportation and distribution of electrical power in instalations where the cable must withstand medium mechanical aggression. It is highly recommended for use in installations in industrial and agricultural environments, engines and machines connection. At the same time, it is suitable for indoor or outdoor use, in damp or dry environments. Top Cable DN-K cables are designed to supply power to low voltage appliances including electric motors and submersible pumps in deep water installations as well as many other types of electrical equipment.

CHARACTERISTICS

- Flexible conductor class 5
- Minimum bending radius 5x cable diameter
- Outdoor installation: permanent
- Grease & mineral oils resistance: excellent
- Minimum service temperature: -40ºC (Fixed and protected installation)
- Meter by meter marking
- Water resistance AD8 submerged
- Abrasion resistance: excellent
- Maximum service temperature 90ºC
- Flame non-propagation
- Chemical & Oil resistance: permanent
- Maximum short-circuit temperature: 250ºC (max. 5 s)
- Impact resistance AG2 medium impact
- Low temperature resistance: excellent

INSTALLATION CONDITIONS

- Industrial use
- Deep wells
- Open air
- Submerged
- Submersible pumps

National norm / European: EN 60332-1 International norm: IEC 60332-1

TOPWELD

H01N2-D

The special cable for welding.

DESIGN

Conductor

Electrolytic copper, class D (flexible), based on UNE 21027-6

Outer sheath

Thermosetting rubber (type EM5). Black colour.

APPLICATIONS

The Topweld H01N2-D cable has been specially designed for transmitting high currents between the welding generator and the electrode. The high degree of flexibility makes using the welding tool easier and also prevants knots from forming in the cable that could cause the internal conductor to break. It can also be used in automatic welding machines, transport belts, and production or assembly lines, for example in automobile assembly lines.

CHARACTERISTICS

- Flexible conductor class 5
- Minimum bending radius 5x cable diameter
- Outdoor installation: permanent
- Abrasion resistance: excellent
- Minimum service temperature: -20ºC
- Meter by meter marking
- Water resistance AD3 aspersion
- Maximum service temperature 85ºC
- Flame non-propagation
- Chemical & Oil resistance: permanent
- Maximum short-circuit temperature: 250ºC (max. 5 s)
- Impact resistance AG2 medium impact
- Grease & mineral oils resistance: excellent

INSTALLATION CONDITIONS

- Industrial use
- Welding

National norm / European: EN 60332-1 International norm: IEC 60332-1

TOPFLAT

H07VVH6-F

Flexibility when moving.

DESIGN

Conductor

Electrolytic copper, class 5 (flexible), based on EN 60228

Insulation

Flexible PVC.

The standard identification is the following:

4 G ..... Brown + Black + Grey + Yellow/green
6 or more conductors ..... Black numbered+ Yellow/green

Outer sheath

Flexible PVC outer sheath, black colour.

APPLICATIONS

The Topflat H07VVH6-F cable is specially suitable for connecting overhead cranes, devices for operating racks, hoists, lifts, etc. The hanging length of the cable can reach up to 35m and its pull out speed can reach up to 1.6 m/s (overlaying cables is not recommended when installing).

CHARACTERISTICS

- Flexible conductor class 5
- Minimum bending radius 25 x cable thickness
- Outdoor installation: occasional
- Minimum service temperature: 0ºC
- Meter by meter marking
- Water resistance AD6 waves
- Maximum service temperature 70ºC
- Flame non-propagation
- Chemical & Oil resistance: good
- Maximum short-circuit temperature: 160ºC (max. 5 s)
- Impact resistance AG2 medium impact

INSTALLATION CONDITIONS

- Industrial use
- Crane bridges
- Elevators
- Robotics

National norm / European: EN 60332-1 International norm: IEC 60332-1

Top Cable

LOW VOLTAGE 300/500 V

Based on: UNE 21031-5 1C

RoHS compliant

FLEXTEL 110

ES05VV-F

Extreme flexibility when moving

DESIGN

Conductor

Electrolytic copper, class 5, based on EN 60228.

Insulation

Flexible PVC insulation, type TI2 according to HD 21.

The standard identification, is the following:

6 or more ..... Black numbered + Green / yellow

Outer sheath

Flexible PVC, grey colour.

APPLICATIONS

Flexible cable for mobile service. Suitable for the connection of machinery parts used in manufacturing, including machine tools. Suitable for indoor use. Its installation is recommended in fixed ducts. Not suitable for buried installations.

CHARACTERISTICS

- Flexible conductor class 5
- Minimum bending radius: 5x cable diameter
- Outdor installation: OCCASIONAL
- Minimum service temperature: 5ºC
- Meter by meter marking
- Water resistance AD5 water jet
- Maximum service temperature 60ºC
- Flame non-propagation
- Chemical & oil resistance: good
- Maximum short-circuit temperature: 150ºC (max. 5 s)
- Impact resistance: AG1 weak impact

INSTALLATION CONDITIONS

- Domestic use
- Domestic appliances
- Open air
- In conduit

National Norm / European: EN 60332-1 International norm: IEC 60332-1

FLEXTEL 140

H05VV5-F

The harmonised oil resistant control cable

DESIGN

Conductor

Electrolytic copper, class 5, based on EN 60228

Insulation

PVC.

The standard identification is the following:

2 x ..... Black numbered

3 or more conductors ..... Black numbered+ Yellow/green

Outer sheath

Flexible PVC oil resistant outer sheath, grey colour.

APPLICATIONS

The Flextel 140 H05VV5-F cable is ideal for signalling and control systems. It is especially suitable for connecting industrial equipment and machine tools. Due to its properties, it is recommended for robotics and light mobile services. Its special vinilic outer sheath compound is particularly resistant to mineral oils and other chemical agents. It can be installed in either dry or humid environments.

CHARACTERISTICS

- Flexible conductor class 5
- Minimum bending radius: 3&4 x cable diameter
- Outdor installation: occasional
- Minimum service temperature: 5ºC
- Meter by meter marking
- Water resistance AD5 water jet
- Maximum service temperature 60ºC
- Flame non-propagation
- Oil resistance: excellent
- Maximum short-circuit temperature: 150ºC (max. 5 s)
- Impact resistance: AG1 weak impact
- Chemical & oil resistance: good

INSTALLATION CONDITIONS

- Industrial mobile use
- In conduit
- Robotics
- Damp environment
- Open air

National Norm / European: EN 60332-1 International norm: IEC 60332-1

FLEXTEL 200

VV-K

The 0,6/1kV control cable

DESIGN

Conductor

Electrolytic copper, class 5, based on EN 60228

Insulation

PVC.

The standard identification is the following:

1 x	Natural
2 x	Brown + Blue
3 G	Brown + Blue + Yellow/green
3 x	Brown + Black +Blue
3 x + 1	Brown + Black + Black + Blue (reduced cross section)
4 G	Brown + Black + Blue + Yellow/green
4 x	Brown + Black + Black + Blue
5 G	Brown + Black + Black + Blue + Yellow/green
6 or more conductors	Black numbered+ Yellow/green

Other identifications are possible on request.

Outer sheath

Flexible PVC outer sheath, black colour. Other colours available on request.

APPLICATIONS

The Flextel 200 VV-K cable is suitable for fixed installations with complex layouts where flexible cables are required. It is also used for connecting motors or frequency converters. The characteristics of the outer sheath material make this cable extremely versatile as it provides a high level of protection in all types of environments.

CHARACTERISTICS

- Flexible conductor class 5
- Minimum bending radius 5x cable diameter
- Outdor installation: occasional
- -40° Minimum service temperature: -40ºC (Fixed and protected installation)
- 1m. Meter by meter marking
- Water resistance AD6 waves
- 70° Maximum service temperature 70ºC
- Flame non-propagation
- Oil resistance: good
- 160° Maximum short-circuit temperature: 150ºC (max. 5 s)
- Impact resistance: AG1 weak impact

INSTALLATION CONDITIONS

- Industrial mobile use
- Damp environment
- Open air
- Buried
- Open air

National Norm / European: EN 60332-1 International norm: IEC 60332-1

SCREENFLEX 110 LiYCY

Safe signal transmission.

DESIGN

Conductor

Electrolytic copper, class 5, based on EN 60228

Insulation

PVC.

The standard identification is the following:

2 x ..... Blue + Brown
3 G ..... Blue + Brown + Yellow/green
4 G ..... Brown + Black + Grey + Yellow/green
4 x ..... Brown + Black + Grey + Blue
5 G ..... Brown + Black + Grey + Yellow/green + Blue
6 or more ..... Black numbered + Yellow/green.

Other identifications (JZ, OZ, J, Z) are available upon request.

Separator

Polyester tape

Screen

Tinned copper braided screening

Outer sheath

Flexible PVC, Black or grey colour.

APPLICATIONS

Screenflex 110 is a screened control cable. It is used in all types of signal transmission connections where the voltage induced by an exterior electromagnetic field may affect the signal transmitted. Its most common applications are: control circuits, electronic equipment connections, computer systems, etc.

CHARACTERISTICS

- Flexible conductor class 5
- Minimum service temperature: -40ºC (Fixed and protected installation)
- Maximum service temperature 70ºC
- Maximum short-circuit temperature: 160ºC (max. 5 s)
- Minimum bending radius 5x cable diameter
- Meter by meter marking
- Flame non-propagation
- Fire non-propagation (only grey outer sheath)
- Impact resistance: AG1 weak impact
- Outdor installation: occasional
- Water resistance AD5 water jet
- Che,ical & Oil resistance: good
- Electric fields resistant

INSTALLATION CONDITIONS

- Industrial use
- Domestic use
- Damp environment

National Norm / European: EN 60332-1 / EN 60332-3 International norm: IEC 60332-1 / IEC 60332-3

LOW VOLTAGE 0.6/1KV

Based on: IEC 60502

RoHS compliant

SCREENFLEX 200 VC4V-K

Power transmission without interference

DESIGN

Conductor

Electrolytic copper, class 5, based on EN 60228

Insulation

PVC.

The standard identification is the following:

1 x ..... natural
2 x ..... Brown + Blue
3 x ..... Brown + Black + Grey
3G ..... Blue + Brown + Yellow/green
3 x + 1 x ..... Brown + Black + Grey + Blue (reduced cross section)
4 x ..... Brown + Black + Grey + Blue
5 G ..... Brown + Black + Grey + Yellow/green + Blue
6 G ..... Black numbered + Yellow/green.

Other identifications (JZ, OZ, J, Z) are available upon request.

Separator

Polyester tape

Screen

Tinned copper braided screening

Outer sheath

Flexible PVC, Black or grey colour.

APPLICATIONS

Screenflex 200 is a screened power supply and control cable. It is used in power supply connections to minimize the generation of electromagnetic fields, in order to protect nearby electronic equipment or signal cables.

CHARACTERISTICS

- Flexible conductor class 5
- Minimum bending radius 5x cable diameter
- Impact resistance: AG2 medium impact
- Electric fields resistant
- Minimum service temperature: -40ºC (Fixed and protected installation)
- Meter by meter marking
- Outdor installation: permanent
- Maximum service temperature 70ºC
- Flame non-propagation
- Water resistance AD5 water jet
- Maximum short-circuit temperature: 160ºC (max. 5 s)
- Fire non-propagation (only grey outer sheath)
- Che,ical & Oil resistance: good

INSTALLATION CONDITIONS

- Industrial use
- Damp environment
- Open air
- In conduit
- Buried

National Norm / European: EN 60332-1 / EN 60332-3 International norm: IEC 60332-1 / IEC 60332-3

Based on: IEC 60502 - UNE 21123-2

POWERFLEX RV-K

The universal flexible cable for power transmission.

DESIGN

Conductor

Electrolytic copper, class 5 (flexible), based on EN 60228

Insulation

XLPE.

The standard identification is the following:

1 x ..... Natural
2 x..... Blue + Brown
3 G..... Blue + Brown + Yellow/green
3 x..... Brown + Black + Grey
3 x + 1 x ..... Brown + Black + Grey + Blue (reduced cross-section)
4 G..... Brown + Black + Grey + Yellow/green
4 x..... Brown + Black + Grey + Blue
5 G..... Brown + Black + Grey + Yellow/green + Blue

Outer sheath

Flexible PVC outer sheath, black colour.

APPLICATIONS

This cable for power distribution is suitable for all types of low voltage industrial-type connections, in urban grids, building installations, etc. Its high flexibility makes the installation process substantially easier and, as a result, is particularly suitable for use in difficult layouts. It can be buried or installed in a tube as well as outdoors without requiring additional protection. The Powerflex RV-K cable can withstand damp conditions including total immersion in water.

Packaging

Available in rolls (lengths of 50 and 100 m) and coils.

CHARACTERISTICS

- Flexible conductor class 5
- Minimum bending radius: 5 x cable diameter
- Outdor installation: permanent
- Minimum service temperature: -40ºC (Fixed and protected installation)
- Meter by meter marking
- Water resistance AD7 immersion
- Maximum service temperature 90ºC
- Flame non-propagation
- Chemical & oil resistance: good
- Maximum short-circuit temperature: 250ºC (max. 5 s)
- Impact resistance: AG2 medium impact

INSTALLATION CONDITIONS

- Industrial use
- Damp environment
- Open air
- Buried
- In conduit

National norm / European: EN 60332-1 International norm: IEC 60332-1

APPLICATIONS

The Powerflex Plus cable for power distribution is suitable for all types of industrial low voltage connections, in urban grids, building installations, etc. This cable is fire retardant and is recommended for use in public places, hazardous industries... Its flexibility makes installation substantially easier, and as a result making it highly suitable for difficult layouts. It can also be used in buried installations or in tubes or outdoors without requiring additional protection. The Powerflex Plus cable withstands damp conditions and even total submersion in water.

CHARACTERISTICS

- Flexible conductor class 2 (flexible)
- Minimum bending radius 5 x cable diameter
- Impact resistance AG2 medium impact
- Minimum service temperature: -40 ºC (Fixed and protected installation)
- Meter by meter marking
- Outdoor installation: permanent
- Maximum service temperature 90ºC
- Flame non-propagation
- Water resistance AD7 immersion
- Maximum short-circuit temperature: 250ºC (max. 5 s)
- Fire non-propagation
- Chemical & Oil resistance: good

INSTALLATION CONDITIONS

- Industrial use
- Damp environment
- Open air
- Buried
- In conduit

Based on: IEC 60502 - UNE 21123-2

BUREAU VERITAS MARINE DIVISION

RoHS compliant

POWERHARD F

RVFV-K & VVFV-K

Protected power transmission.

DESIGN

Conductor

Electrolytic copper, class 5, based on EN 60228

Insulation

XLPE for RVFV or PVC for VVFV. The standard identification is the following

1 x	natural
2 x	Blue + Brown
3 G	Blue + Brown + Yellow/green
3 x	Brown + Black + Grey
3 x + 1 x	Brown + Black + Grey+ Blue (reduced cross section)
4 G	Brown + Black + Grey + Yellow/green
4 x	Brown + Black + Grey + Blue
5 G	Brown + Black + Grey + Yellow/green + Blue
6 G or more	Black numbered + Yellow/green.

Armour bedding

PVC.

Armour

Double steel or aluminium tape armour. Aluminium armour is used in single-core cables to avoid parasite currents that may overheat the cable. Steel type is used in the multi-core cables.

Outer sheath

PVC, black colour.

APPLICATIONS

Due to its design, this cable is especially suitable for fixed installations that may be subject to mechanical aggression. It is highly recommended for use in installations in warehouses, production plants and agricultural facilities where the presence of rodents could imply a threat to the cable. At the same time, its use is recommended for street lighting installations.

CHARACTERISTICS

- Flexible conductor class 5
- Minimum bending radius: 10 x cable diameter
- Outdor installation: permanent
- Minimum service temperature: -40ºC (Fixed and protected installation)
- Meter by meter marking
- Water resistance AD7 immersion
- Maximum service temperature 90ºC/70ºC
- Flame non-propagation
- Chemical & oil resistance: good
- Maximum short-circuit temperature: 250ºC /160ºC (max. 5 s)
- Impact resistance: AG4 high impact

INSTALLATION CONDITIONS

- Industrial use
- Damp environment
- Open air
- Rodent proof
- Buried
- In conduit

Based on: IEC 60502 - UNE 21123-2

RoHS compliant

POWERHARD M

RVMV-K & VVMV-K

Highly protected power transmission

DESIGN

Conductor

Electrolytic copper, class 5, based on EN 60228

Isulation

XLPE for RVMV-K or PVC for VVMV-K

The standard identification is the following

1 x	natural
2 x	Blue + Brown
3 G	Blue + Brown + Yellow/green
3 x	Brown + Black + Grey
3 x + 1 x	Brown + Black + Grey+ Blue (reduced cross section)
4 G	Brown + Black + Grey + Yellow/green
4 x	Brown + Black + Grey + Blue
5 G	Brown + Black + Grey + Yellow/green + Blue

Armour bedding

PVC.

Armour

Galvanized steel wire armour, is wound around the separation sheath. For single-core cables (RVMAV-K or VVMAV-K), aluminium wire armour is used to avoid parasite currents that may overheat the cable.

Outer sheath

PVC, black colour.

APPLICATIONS

The Powerhard M cable's design is especially suitable for fixed installation in potentially explosion hazard locations. It is highly recommended for use in petrol stations, petrochemical plants, flammable product warehouses, etc. At the same time, it can be used in installations such as production plants, agricultural facilities, street lighting and installations in general where the cable is subject to risk of mechanical aggression.

CHARACTERISTICS

- Flexible conductor class 5
- Minimum bending radius: 10x cable diameter
- Impact resistance: AG3. High impact.
- Suited for explosion proof installations.
- Minimum service temperature: -40ºC (Fixed and protected installation)
- Meter by meter marking
- Outdor installation: permanent
- Maximum service temperature 90ºC/70ºC
- Flame non-propagation
- Water resistance AD7 immersion
- Maximum short-circuit temperature: 250ºC/160ºC (max. 5 s)
- Fire non-propagation
- Chemical & oil resistance: good

INSTALLATION CONDITIONS

- Industrial use
- Damp environment
- Open air
- Rodent proof
- Buried
- In conduit

Top Cable

LOW VOLTAGE 0,6/1kV

Based on: UNE-HD 603-5N / NF C 32-321

NF-USE AENOR RoHS compliant

POWERHARD

RV AL / U-1000 AR2V

Aluminium cable for power transmission

DESIGN

Conductor

Aluminium, class 2 based on EN 60228

Insulation

XLPE natural colour.

Outer sheath

PVC, Black or grey colour.

APPLICATIONS

This cable is suitable for all types of underground networks for public power distribution, as well as low voltage connexions in industrial plants, urban networks, buildings, etc.

CHARACTERISTICS

- Rigid aluminium conductor class 2
- Minimum service temperature: -40ºC (Fixed and protected installation)
- Maximum service temperature 90ºC
- Maximum short-circuit temperature: 250ºC (max. 5 s)
- Minimum bending radius: 15x cable diameter
- Meter by meter marking
- Flame non-propagation
- Impact resistance: AG2. medium impact.
- Outdor installation: permanent
- Water resistance AD7 immersion
- Chemical & oil resistance: good

INSTALLATION CONDITIONS

- Industrial use
- Damp environment
- Open air
- Buried
- In conduit

National Norm / European: NFC 30-070 (C2) / EN 60332-1 International norm: IEC 60332-1

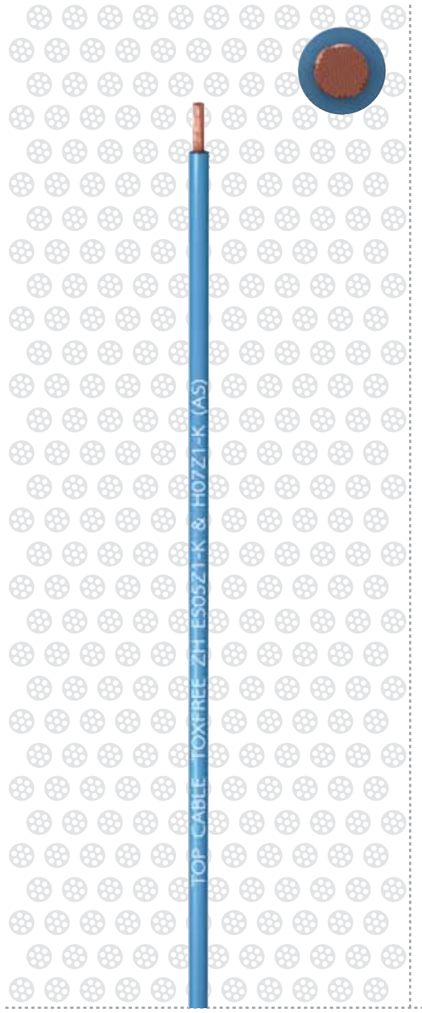
Based on: HD 21.15 - UNE 211002

TOXFREE ZH

ES05Z1-K & H07Z1-K (AS)

Safety connections.



DESIGN

Conductor

Electrolytic copper, class 5 (flexible), based on EN 60228

Insulation

LSZH poliolefin insulation, with extra sliding properties.

The standard identification is the following:

Blue ..... RAL 5015
Brown ..... RAL 8002
Black ..... RAL 9011
Grey ..... RAL 7046
Yellow/Green ..... RAL 1021/6028
Red ..... RAL 3000
White ..... RAL 1013

Other colours available upon request

APPLICATIONS

The Toxfree ES05Z1- K & ES07Z1-K (AS) halogen free single core cable is a safety cable. In the event of fire, it does not emit toxic gases, thereby protecting people. Nor does it give off corrosive gases, avoiding any possible damage to electronic equipment. For these reasons it is highly recommended for use in public places such as: hospitals, schools, museums, airports, bus terminals, shops in general, etc., as well as in computer rooms, offices, production plants, switchboard wiring, laboratories, etc.

Packaging

Small cross sections (from 0,75 mm² to 6 mm²) are supplied in high-resistant boxes. Medium cross sections (from 10 mm² to 35 mm²) are supplied in 100 m sealed coils. Greater cross sections (>35 mm²) are supplied in drums.

CHARACTERISTICS

- Rated voltage: ES05Z1-K (AS) (up to 1mm²) :300/500 V. H07Z1-K (AS) (from 1,5mm² on wards): 450/750 V.
- Flexible conductor class 5
- Minimum service temperature: -40ºC (Fixed and protected installation)
- Maximum service temperature 90ºC
- Maximum short-circuit temperature: 160ºC (max. 5 s)
- Minimum bending radius 5x cable diameter
- Flame non-propagation
- Fire non-propagation
- LSZH
- Low smoke emission: Light transmittance > 60%
- Low corrosive gases emission
- Environmentally friendly
- Water resistance A2 drip
- Che,ical & Oil resistance: good
- Marine

INSTALLATION CONDITIONS

- Public places
- Domestic use
- In conduit
- Electrical panel wiring

National Norm / European: EN 60332-1 / EN 60332-3 / EN 50267-1 / EN 50267-2 / EN 61034

LOW VOLTAGE 0,6/1kV

TOXFREE ZH

Based on: IEC 60502

RoHS compliant

Z1C4Z1-K (AS)

The halogen free screened control cable

DESIGN

Conductor

Electrolytic copper, class 5 (flexible), based on EN 60228

Insulation

LSZH Polyolephine insulation.

The standard identification is the following.

6 or more conductors: ..... Black numbered + Yellow/green.

Separator

Polyester tape separator to avoid direct contact between the insulated conductors and the copper braid.

Screen

Tinned copper braided screening.

Outer sheath

LSZH poliolefin outer sheath. Green colour, non-toxic and fire retardant.

APPLICATIONS

The screened and halogen free control cable Toxfree ZH Z1C4Z1-K (AS) is a safety cable. In case of fire, it does not emit toxic or corrosive gases, thereby protecting public health and avoiding any possible damage to electronic equipment. For this reason, its use is highly recommended for public places and for all installations where it is necessary avoid electric interference of nearby circuits.

CHARACTERISTICS

- Flexible conductor class 5
- Minimum bending radius 5x cable diameter
- LSZH
- Impact resistance AG2 medium impact
- Minimum service temperature: -40ºC (Fixed and protected installation)
- Meter by meter marking
- Low smoke emission: Light transmittance > 60%
- Outdoor installation: permanent
- Maximum service temperature 70ºC
- Flame non-propagation
- Low corrosive gases emission
- Water resistance AD3 aspersión
- Maximum short-circuit temperature: 160ºC (max. 5 s)
- Fire non-propagation
- Environmentally friendly
- Chemical & Oil resistance: permanent

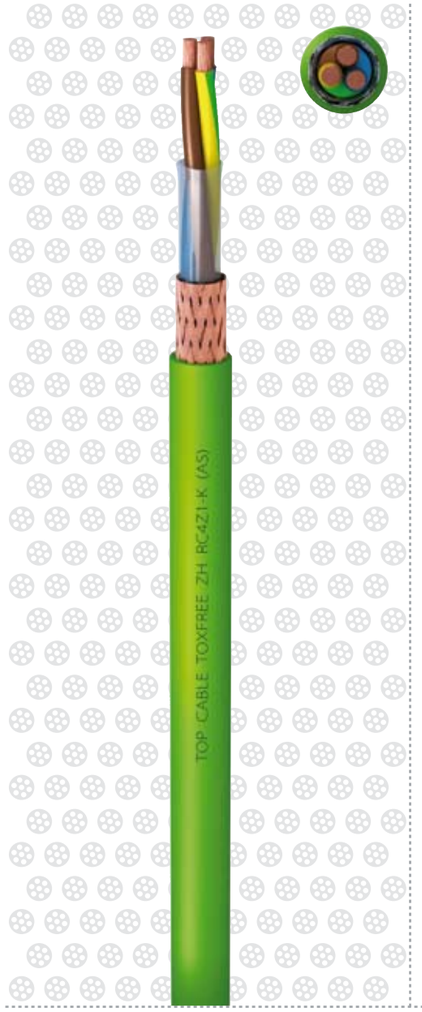
Based on: IEC 60502 - UNE 21123-4

RoHS compliant

TOXFREE ZH

RC4Z1-K (AS)

The halogen free screened power cable



DESIGN

Conductor

Electrolytic copper, class 5 (flexible), based on EN 60228

Insulation

XLPE.

The standard identification is the following:

1 x	natural
2x	Blue + Brown
3 G	Blue + Brown + Yellow/green
3 x	Brown+ Black+ Grey
4 G	Brown + Black + Grey + Yellow/green
4 x	Brown + Black + Grey + Blue
5 G	Brown + Black + Grey + Yellow/green + Blue

Separator

Polyester tape separator to avoid direct contact between the insulated conductors and the copper braid.

Screen

Tinned copper braided screening

Outer sheath

LSZH poliolefin outer sheath. Green colour, non-toxic and fire retardant.

APPLICATIONS

The screened and halogen free cable Toxfree ZH RC4Z1-K (AS) is a safety cable. In case of fire, it does not emit toxic or corrosive gases, thereby protecting public health and avoiding any possible damage to electronic equipment. For this reason, its use is highly recommended for public places and for all installations where it is necessary avoid to electric interference of nearby circuits .

CHARACTERISTICS

- Flexible conductor class 5
- Minimum bending radius 5x cable diameter
- LSZH
- Minimum service temperature: -40ºC (Fixed and protected installation)
- Meter by meter marking
- Low smoke emission: Light transmittance > 60%
- Maximum service temperature 90ºC
- Flame non-propagation
- Low corrosive gases emission
- Maximum short-circuit temperature: 250ºC (max. 5 s)
- Fire non-propagation
- Impact resistance AG2 medium impact

INSTALLATION CONDITIONS

- Outdoor installation: permanent
- Public places
- In conduit
- Water resistance AD3 aspersión
- Industrial use
- Chemical & Oil resistance: permanent
- Open air
- Electric fields resistant
- Buried

5 G	Brown + Black + Grey + Yellow/green + Blue

Armour bedding

LSZH polyolephine inner sheath

Armour

Galvanised steel or aluminium tape armour. Aluminium armour is used in single core cables to avoid parasite currents that may overheat the cables.

Outer sheat

LSZH poliolefin outer sheath. Green colour, non-toxic and fire retardant.

APPLICATIONS

The armoured and halogen free cable Toxfree ZH RZ1FZ1-K (AS) is a safety cable. In case of fire, it does not emit toxic or corrosive gases, thereby protecting public health and avoiding any possible damage to electronic equipment. For this reason, its use is highly recommended for public places, in installations with presence of rodents, and installations in general where the cable is subject to risk of mechanical aggresion.

CHARACTERISTICS

- Flexible conductor clas 5
- Minimum bending radius 10x cable diameter
- LSZH
- Impact resistance AG3 strong impact
- Public places
- In conduit
- Minimum service temperture: -40ºC (Fixed and protected installation)
- Meter by meter marking
- Low smoke emission: Light transmittance > 60%
- Outdoor installation: permanent
- Industrial use
- Rodent proof
- Maximum service temperature 90ºC
- Flame non-propagation
- Low corrosive gases emission
- Water resistance AD3 aspersión
- Open air
- Maximum short-circuit temperature: 250ºC (max. 5 s)
- Fire non-propagation
- Environmentally friendly
- Chemical & Oil resistance: permanent
- Buried

TOXFREE ZH

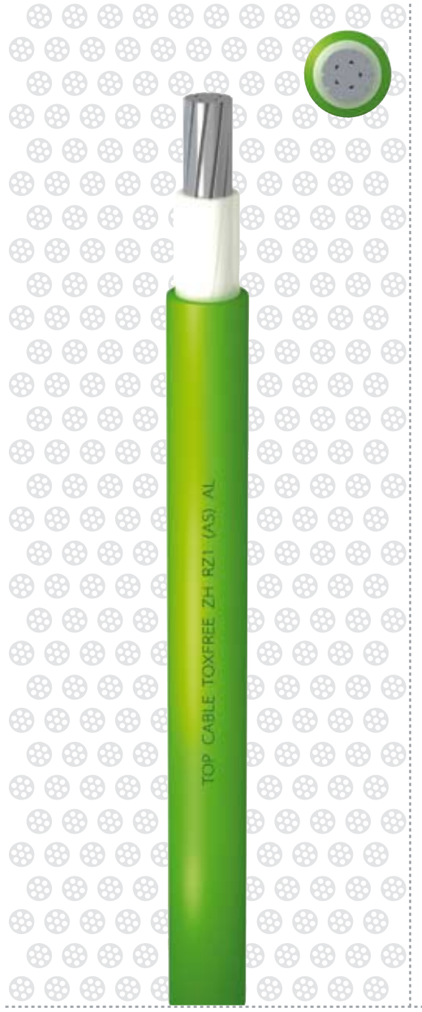
RZ1 (AS) AL

Aluminium non fire propagator cable for power transmission



DESIGN

Conductor

Aluminium, class 2 based on EN 60228

Insulation

XLPE natural colour.

Outer sheath

LSZH poliolefin outer sheath. Green colour, non-toxic and fire retardant.

APPLICATIONS

Aluminium LSZH cable for fixed installations. Suitable for transport and distribution of electric power. These cables are especially recommended for installation in public places and in instalations where safety is a priority. Safety (AS) cable, Non-Flame and non-Fire-Propagator.

❖❖ CHARACTERISTICS

- Rigid aluminium conductor class 2
- Minimum bending radius 15 x cable diameter
- LSZH
- Minimum service temperature: -40ºC (Fixed and protected installation)
- Meter by meter marking
- Low smoke emission: Light transmittance > 60%
- Maximum service temperature 90ºC
- Flame non-propagation
- Low corrosive gases emission
- Maximum short-circuit temperature: 250ºC (max. 5 s)
- Fire non-propagation
- Environmentally friendly

❖❖ INSTALLATION CONDITIONS

- Impact resistance AG2 medium impact
- Public places
- Outdoor installation: permanent
- Industrial use
- Water resistance AD3 aspersion
- Open air
- Chemical & Oil resistance: permanent
- Buried

Based on: UNE-HD 603-5X

AENOR

RoHS compliant

TOXFREE ZH

XZ1 (S) AL

Aluminium non-flame propagator cable for power transmission

DESIGN

Conductor

Aluminium, class 2 based on EN 60228

Insulation

XLPE natural colour.

Outer sheath

LSZH polyolefin, black colour.

APPLICATIONS

The aluminium cable Toxfree ZH XZ1 (S) is suitable for public low voltage power distribution. This cable is a non flame propagator and LSZH. For use indoors, outdoors and buried.

CHARACTERISTICS

- Rigid aluminium conductor, class 2
- Minimum service temperature: -40ºC (Fixed and protected installation)
- Maximum service temperature 90ºC
- Maximum short-circuit temperature: 250ºC (max. 5 s)
- Minimum bending radius 15x cable diameter
- Meter by meter marking
- Flame non-propagation
- LSZH
- Low smoke emission: Light transmittance > 60%
- Low corrosive gases emission
- Impact resistance AG2 medium impact
- Outdoor installation: permanent
- Water resistance AD3 aspersion
- Chemical & Oil resistance: acceptable
- Environmentally friendly

INSTALLATION CONDITIONS

- Public places
- Industrial use
- Open air
- Buried

Norma nacional / Europea: EN 60332-1 / EN 50267-1 / EN 50267-2 / EN 61034

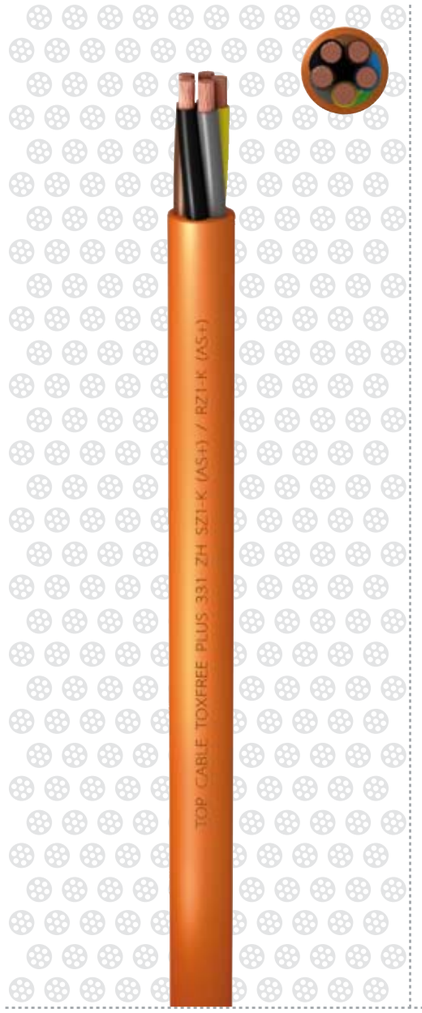
TOXFREE PLUS 331 ZH

SZ1-K (AS+) / RZ1-K (AS+)

The fire resistant power cable



DESIGN

Conductor

Electrolytic copper, class 5 (flexible), based on EN 60228

Insulation

Preferred constructions:

SZ1-K: Silicone rubber up to 4 mm2

RZ1-K: Mica tape + XLPE from 6 mm2

The standard identification is the following:

1 x ..... Natural
2x ..... Blue + Brown
3 G ..... Blue + Brown + Yellow/green
4 G ..... Brown + Black + Grey + Yellow/green
5 G ..... Brown + Black + Grey + Yellow/green + Blue

Outer sheath

LSZH polyolefin outer sheath, orange colour.

APPLICATIONS

The Toxfree Plus 331 ZH SZ1-K (AS+) / RZ1-K (AS+) is specially designed to transmit electric power in extrem conditions such as durning a fire. Where it is necessary to enscure the power supply to emergency circuits, signaling lights, fume extractors, acustic alarms, water pumps, etc. In case of fire, it does not emit toxic or corrosive gases, thereby protecting public health and avoiding any possible damage to electronic equipment. For this reason, its use is highly recommended in public places such as: hospitals, schools, museums, airports, bus terminals, shops in general, tunnels, the underground, etc., as well as in, offices, production plants, laboratories, etc.

CHARACTERISTICS

- Flexible conductor, class 5
- Minimum bending radius 5x cable diameter
- Fire resistant 120 min at 840º PH120
- Impact resistance AG2 medium impact
- Emergency circuits
- Buried
- Minimum service temperature: -40ºC (Fixed and protected installation)
- Meter by meter marking
- LSZH
- Outdoor installation: permanent
- Public places
- In conduit
- Maximum service temperature 90ºC
- Flame non-propagation
- Low smoke emission: Light transmittance > 60%
- Water resistance AD3 aspersion
- Industrial use
- Maximum short-circuit temperature: 250ºC (max. 5 s)
- Fire non-propagation
- Low corrosive gases emission
- Chemical & Oil resistance: acceptable
- Open air

INSTALLATION CONDITIONS

Top Cable

LOW VOLTAGE 450/750 V

Based on: HD 22.13 / UNE 21027-13

RoHS compliant

TOXFREE ZH XTREM HO7ZZ-F (AS)

The extra-flexible LSZH rubber cable.

DESIGN

Conductor

Electrolytic copper, class 5 (flexible), based on EN 60228

Insulation

LSZH Rubber (type EI8).

The standard identification is the following:

1 x	Natural
2 x	Brown + Blue
3 G	Brown + Blue + amararillo/verde
4 G	Brown + Black + Grey + Yellow/green
5 G	Brown + Black + Grey + Blue + Yellow/green

Outer sheath

LSZH thermosetting rubber (type EM8). Black colour.

APPLICATIONS

Flexible cable for mobile service, suitable for instalations where low smoke and halogen free fumes under fire conditions are required. Suitable for installations where the cable must withstand medium mechanical stress, for machines in industrial and agricultural workshops, for motors and transportable machines on construction sites, for windmills and for agricultural applications.

CHARACTERISTICS

- Flexible conductor, class 5
- Minimum service temperature: -40ºC (Fixed and protected installation)
- Maximum service temperature 70ºC
- Maximum short-circuit temperature: 250ºC (max. 5 s)
- Minimum bending radius 3x cable diameter
- Meter by meter marking
- Flame non-propagation
- Fire non-propagation
- LSZH
- Low smoke emission: Light transmittance > 60%
- Low corrosive gases emission
- Environmentally friendly
- Impact resistance AG2 medium impact
- Outdoor installation: permanent
- Water resistance AD7 immersion
- Chemical & Oil resistance: excellent

INSTALLATION CONDITIONS

- Public places
- Industrial use
- Industrial mobile use
- Heavy mobile use
- Windmills
- Open air
- Damp environment

Cables for photovoltaic solar installations

DESIGN

Conductor

Class 5 tinned copper, based on EN 60228

Insulation

LSZH thermosetting Rubber (EI6 type)

Outer sheath

LSZH thermosetting rubber (type EM8). Red or black colour.

APPLICATIONS

Flexible cables for mobile service and for fixed installations. Specially designed for the connection of photovoltaic panels.

Packaging

Available in rolls (lengths of 50 and 100 m) and coils.

CHARACTERISTICS

- Flexible conductor class 5/6
- Minimum bending radius 3 x cable diameter
- Impact resistance AG2 medium impact
- UV resistant
- Minimum service temperature: -40 ºC (Fixed and protected installation)
- Meter by meter marking
- Water resistance AD7 immersion
- Estimated lifetime 30 years
- Maximum service temperature 120ºC
- Flame non-propagation
- Chemical & Oil resistance: good
- Grease & mineral oils resistance: excellent
- Maximum short-circuit temperature: 250ºC (max. 5 s)
- Outdoor installation: occasional
- Low extreme temperature resistance: excellent
- Abrasion resistance: excellent

INSTALLATION CONDITIONS

- Photovoltaics solar installations
- Open air

3. Appendix

3.1 Cable designation

Each cable has a designation code according to the standard.This description is made up of by a set of letters and numbers, each one representing a different aspect of the cables composition.

Each cable is defined by a series of characteristics of the product (materials, nominal voltage, etc.) that help the buyer/installer to choose the type of cable that is suited to their needs. The cable name aids the logistics department in identifying the actual cable ordered by the client.

We have divided the following cable designation into three blocks:

3.1.1. Low Voltage Cables .....0,6 / 1 kV

3.1.2. Low Voltage Cables .....up to 750 V

3.1.3. Low Voltage Cables .....(s/VDE 0245)

3.1.1. Low Voltage Cables 0,6 / 1 kV

	A	B	C	D	E	F	G	H	I
	NAME OF MANUFACTURER AND TRADEMARK	INSULATION	OUTER SHEATH, INTERNAL COATING, SCREEN ARMOUR	SHIELD TYPE	OUTER SHEATH	CONDUCTOR	ASSIGNED NOMINAL VOLTAGE IN kV	NUMBER OF CONDUCTORS, SYMBOL AND SECTION	STANDARD FOR CABLE DESIGN
EXAMPLE	TOP CABLE POWERFLEX	R			V	-K	0,6/1 kV	4G 16	UNE 21123 IEC 60502

A. Name of manufacturer and Trademark

After the name of the manufacturer (Top Cable, in this case) and of the Trademark (Powerflex), the letters and the numbers refer to the coverings of the cable, from the other sheaths, to the type of conductor, the nominal voltage and the final composition of the cable.

The meaning of each letter within each section is as follows:

B. Insulation:

R .....Cross-linked Polyethylene (XLPE).
X.....Cross-linked Polyethylene (XLPE).
Z1 .....Thermoplastic halogen free Polyolefin.
Z.....Cross-linked halogen free Elastomer
V .....Polyvinyl chloride (PVC).
S.....Cross-linked halogen free silicone compound.
D .....Ethylene-Propylene Rubber (EPR).

C. Screen, internal coating, screen armour:

C3 .....Screen corrugated copper tape.
C4 .....Braided copper screen.
V .....Polyvinyl chloride (PVC).
Z1 .....LSZH Poliolefin
If there is no internal covering or any screen armour, no letter is used.

D. Type of armour:

F.....Helicoidal steel ribbon.
FA.....Helicoidal aluminium ribbon.
FA3.....Lengthwise corrugated aluminium ribbon.
M.....Steel wire armour.
MA.....Aluminium wire armour.

E. Outer sheath:

V:.....Polyvinyl chloride (PVC).
Z1 .....Thermoplastic halogen free Polyolefin.
Z.....Cross-linked halogen free Elastomer.
N .....Vulcanized Chlorinated Polymer.

F. Conductor:

-K .....Flexible copper (class 5) for fixed installations.
-F .....Flexible copper (class 5) for mobile services.
-D .....Flexible for welding machine cables.

When there is no letter, the conductor if rigid copper, class 1 or 2

AL.....If the conductor is aluminium, (AL) is indicated.

G. Nominal voltage:

0,6/1 kV .....Nominal voltage 1.000V

H. Number of conductors, symbol and cross section:

nGS.....number and cross section of the conductors, in mm2, one of tem being yellow/green conductor
nxS.....number and cross section of the conductors, in mm2, one of tem being yellow/green conductor

I. Standards for cable design:

The references to the standards for the design of the cable in question are indicated
UNE 21123 / IEC 60502 / UNE 21150, ...

Lastly, the markings of the cable can contain additional details like:

CE.....Obligatory CE marking for commercial products in the European Community The mark can be on the product or on the packing

Date of manufacturing .....(YYMMDD) the date of manufacturing is usually indicated for tracking purposes. Tracking allows us to know when the cable was produced, the materials and more useful information.

3.1.2. Low Voltage Cables up to 750 V

Top Cable Topflex H05V-K, H07V-K
Top Cable Topflex ..... Tri-Rated
Top Cable Topflex ..... VV-F & H05VV-F
Top Cable Topflat H07VVH6-F
Top Cable Flextel 140 ..... H05VV5-F
Top Cable Toxfree ZH ..... ES05Z1, ES07Z1 & H07Z1
Top Cable Toxfree XTREM H07ZZ-K
Top Cable Xtrem H07RN-F
Top Cable Topweld H01N2-D

	A	B	C	D	E	F	G	H	I	J
	NAME OF MANUFACTURER AND TRADEMARK	STANDARDS SYMBOL	ASSIGNED VOLTAGE	INSULATION	METALLIC COATINGS	OUTER SHEATH	CONSTITUTIVE ELEMENTS AND SPECIAL CONSTRUCTION	CONDUCTOR	NUMBER OF CONDUCTORS, SYMBOL AND SECTION	CERTIFICATION
EXAMPLE	TOP CABLE Xtrem	H	07	R		N		-F	4x50	AENOR <HAR>

A. Name of manufacturer and Trademark:

After the name of the manufacturer (in this case, Top Cable) and of the Trademark (Xtrem), the letters and numbers refer to its standardization, the nominal voltage, the cable insulations, metallic coverings, the type of conductors, and the final composition of the cable.

The meaning of each letter within each section is as follows:

B. Standards Symbol:

H ..... Means that the cable is designed and made according to harmonized standards.

C. Assigned voltage:

01 ..... 100/100V
03 ..... 300/300V
05 ..... 300/500V
07 ..... 450/750V

D. Insulation:

R ..... Rubber (EI4)
B ..... Ethylene-Propylene Rubber (EPR).
G ..... Copolymer ethylene vinyl acetate (EVA).
N ..... Elastomer polychloroprene.
R ..... Natural rubber (NR) or styrene-butadiene rubber (SBR).
S ..... Silicone rubber.
V ..... Polyvinyl chloride (PVC).
V2 ..... PVC (90ºC service).
V3 ..... PVC (low temperature service).
V4 ..... Polyvinyl chloride (cross-linked).
Z ..... Polyolefin with low emission of corrosive gases and smoke.
Z1 ..... Thermoplastic polyolefin with low emission of corrosive gases and smoke.

E. Metallic coatings:

C4 ..... Copper braided screen.

F. Outer sheath:

B ..... Ethylene-Propylene Rubber (EPR).
G ..... Copolymer ethylene vinyl acetate (EVA).
J ..... Plaited fibreglass.
N ..... Polychloroprene (or similar product).
N4 ..... Chlorosulfonated Polyethylene (CM).
N8 ..... Special polychloroprene, water resistant.
Q ..... Thermoplastic Polyurethane (TPU).
R ..... Natural rubber (NR) or styrene-butadiene rubber (SBR).
S ..... Silicone rubber.
T ..... Textile braided over insulated conductors.
V ..... Polyvinyl chloride (PVC).
V2 ..... PVC (90ºC service).
V3 ..... PVC (low temperature service).
V4 ..... Polyvinyl chloride (reticulated).
V5 ..... PVC (oil resistant).
Z ..... Cross-linked polyolefin with low emission of corrosive gases and smoke.
Z1 ..... Thermoplastic polyolefin with low emission of corrosive gases and smoke.

G. Constitutive elements and special construction:

None ..... Round cable.
D3 ..... Conducting element made up of one or more components (metallic or textile) located in the centre of a round cable or distributed across the width of a flat cable.
H ..... Flat cables, with or without an outer sheath, with insulated conductors that can be separated.
H2 ..... Flat cables, with insulated conductors that cannot be separated.
H6 ..... Flat cables with three or more insulated conductors.
H7 ..... Double sheath of extruded insulation.
H8 ..... Extendable cable.

H. Conductor:

-D ..... Flexible for welding machine cables.
-E ..... Very Flexible for use in welding machines.
-F ..... Flexible copper for mobile installations (class 5 of IEC 60228).
-H ..... Extra-flexible (class 6 of IEC 60228).
-K ..... Flexible copper for fixed installations (class 5 of IEC 60228).
-R ..... Rigid, with round section, of various wired cables.
-U ..... Solid strand copper.
-Y ..... Copper strips wrapped helicoidally round a textile support (Oropel).

I. Number of conductors, symbol and cross section:

nGS ..... number and cross section of the conductors, in mm2, one of them being yellow/green conductor.
nxS ..... number and cross section of the conductors, in mm2, one of them being yellow/green conductor.

J. Certification:

AENOR <HAR> ..... Means that the product is subject to a regular control of manufacturing by an external organisation (AENOR), and having the corresponding certificate. It is a certified product <HAR>

Lastly, the markings of the cable can contain additional details like:

CE ..... Obligatory CE marking for commercial products in the European Community This mark can be on the product or on the packing.
Date of manufacturing ..... (YYMMDD) the date of manufacturing is usually indicated for tracking purposes. Tracking us to know when the cable was produced, the materials and more useful information.

3.1.3. Low Voltage Cables (s/VDE 0245):

Top Cable Flextel 110 ..... YSLY

Top Cable Screenflex 110 ..... LiYCY

Abbreviations for designation of s/VDE 0245 cables:

After the name of the manufacturer (in this case, Top Cable) and of the Trademark, the letters and numbers refer to the cable sheathings, metallic coverings, the type of conductors, and the final composition of the cable.

Following is a list of the meanings of the most important letters:

A ..... Cables for outdoor use.

G ..... Cables for mines.

J ..... Cables for indoor use.

JE ..... Cables for interior use in industrial electronic control systems or data processing.

S ..... Cables for telephone switchboards.

Li ..... Flexible conductor within the cable.

2Y ..... Insulation or sheath of solid PE.

H ..... Halogen free insulation.

02Y ..... Cellular PE insulation.

02YS ..... Foam-skin insulation (double layer, cellular PE and solid).

Y ..... PVC insulation.

F ..... Nucleus of cable filled with jelly (petrolate ...).

C ..... Copper braided screen.

(L) ..... Screen (tape) of aluminium-copolymer.

b ..... Armour of strands or steel tape.

Bd ..... Cables in groups.

BdiMF ..... Screened groups with metallic tape.

P ..... Pairs.

PiMF ..... Screened pairs with metallic tape.

ViMF ..... Screened quads with metallic tape.

Lg ..... Cables in concentric layers.

Types of armour:

R ..... Round steel wires.

F ..... Steel bands (flat wires).

2B ..... Double layers of steel bands.

Example **Screenflex 110 LiYCY**

Li ..... Flexible conductor of the cable.

Y ..... PVC insulation.

C ..... Copper plait (screen).

Y ..... PVC sheath.

Now that we have seen the various elements and codings involved we can proceed to the final cable description see examples and comments (below).

Example 1 **TOP CABLE FLEXTEL 140 H05VV5-F 19G1 UNE 21031 HD 21 AENOR <HAR> CE 120416**

TOP CABLE ..... Manufacturer of the cable.

FLEXTEL 140 ..... Trademark of the manufacturer.

H05VV5-F ..... Harmonized cable (H) of 500V (05), PVC insulation (V), oil resistant PVC sheath (V5) and flexible conductor, for mobile services (F). Cables with the H in the code represent cables carrying the <HAR>, harmonized specification.

19G1 ..... Cable with 19 conductors of 1 mm^2, being one of them a yellow-green.

UNE 21031 HD 21 ..... Standard for cable design: Spanish and its correlative European.

AENOR <HAR> ..... Means that the product is subject to manufacturing control by an external organization AENOR and it is a certified product <HAR>.

CE ..... Obligatory CE marking for commercial products in the European Community This mark can be on the product or on the packing.

120416 ..... Date of manufacturing (YYMMDD) .

Example 2 **TOP CABLE TOPFLEX H05VV-F AENOR <HAR>**

TOP CABLE ..... Manufacturer of the cable.

TOPFLEX ..... Trademark of the manufacturer.

H05VV5-F ..... Harmonized cable (H) of 500V (05), PVC insulation (V), PVC sheath (V) and flexible conductor, for mobile services (F).

AENOR <HAR> ..... Means that the product is subject to manufacturing control by an external organization AENOR and it is a certified product <HAR>.

Example 3 **TOP CABLE POWERHARD RVMV 0,6/1 kV 3X2,5 UNE 21123 IEC 60502 CE 120416**

TOP CABLE ..... Manufacturer of the cable.

POWERHARD ..... Trademark of the manufacturer.

RVMV ..... Insulated cable with XPLE (R), with a PVC screen (V), steel wire armouring (M) and sheathed with PVC (V).

0,6/1 kV ..... The nominal voltage of the cable is 1000 V.

3X2,5 ..... Cable with three conductors of 2,5 mm^2.

UNE 21123 IEC 60502 .... Standard for cable design: In these standards the cable has an exactly defined thicknesses, material qualities, tests to be made, etc. The UNE 21123 is the Spanish design standard The IEC 60502 is the European standard on which the UNE 21123 is founded.

CE ..... Obligatory CE marking for commercial products in the European Community This mark can be on the product or on the packing.

090102 ..... Date of manufacturing (YYMMDD)

3.5 Certifications and approvals

Certified Company

Certificate of the Quality Management system in accord with standard UNE-EN ISO 9001:2000 for all companies integrated in Top Cable Group:

Alcabe S.A.: Rubí / Bellpuig / Sallent

Certified Products

Top Cable products are guaranteed by the following international certifications:

Si vous souhaitez obtenir une copie de ces certificats, veuillez prendre contact avec votre commercial Top Cable habituel ou envoyez votre demande à topcable@topcable.com

1. Methods of installation

Current-carrying capacities

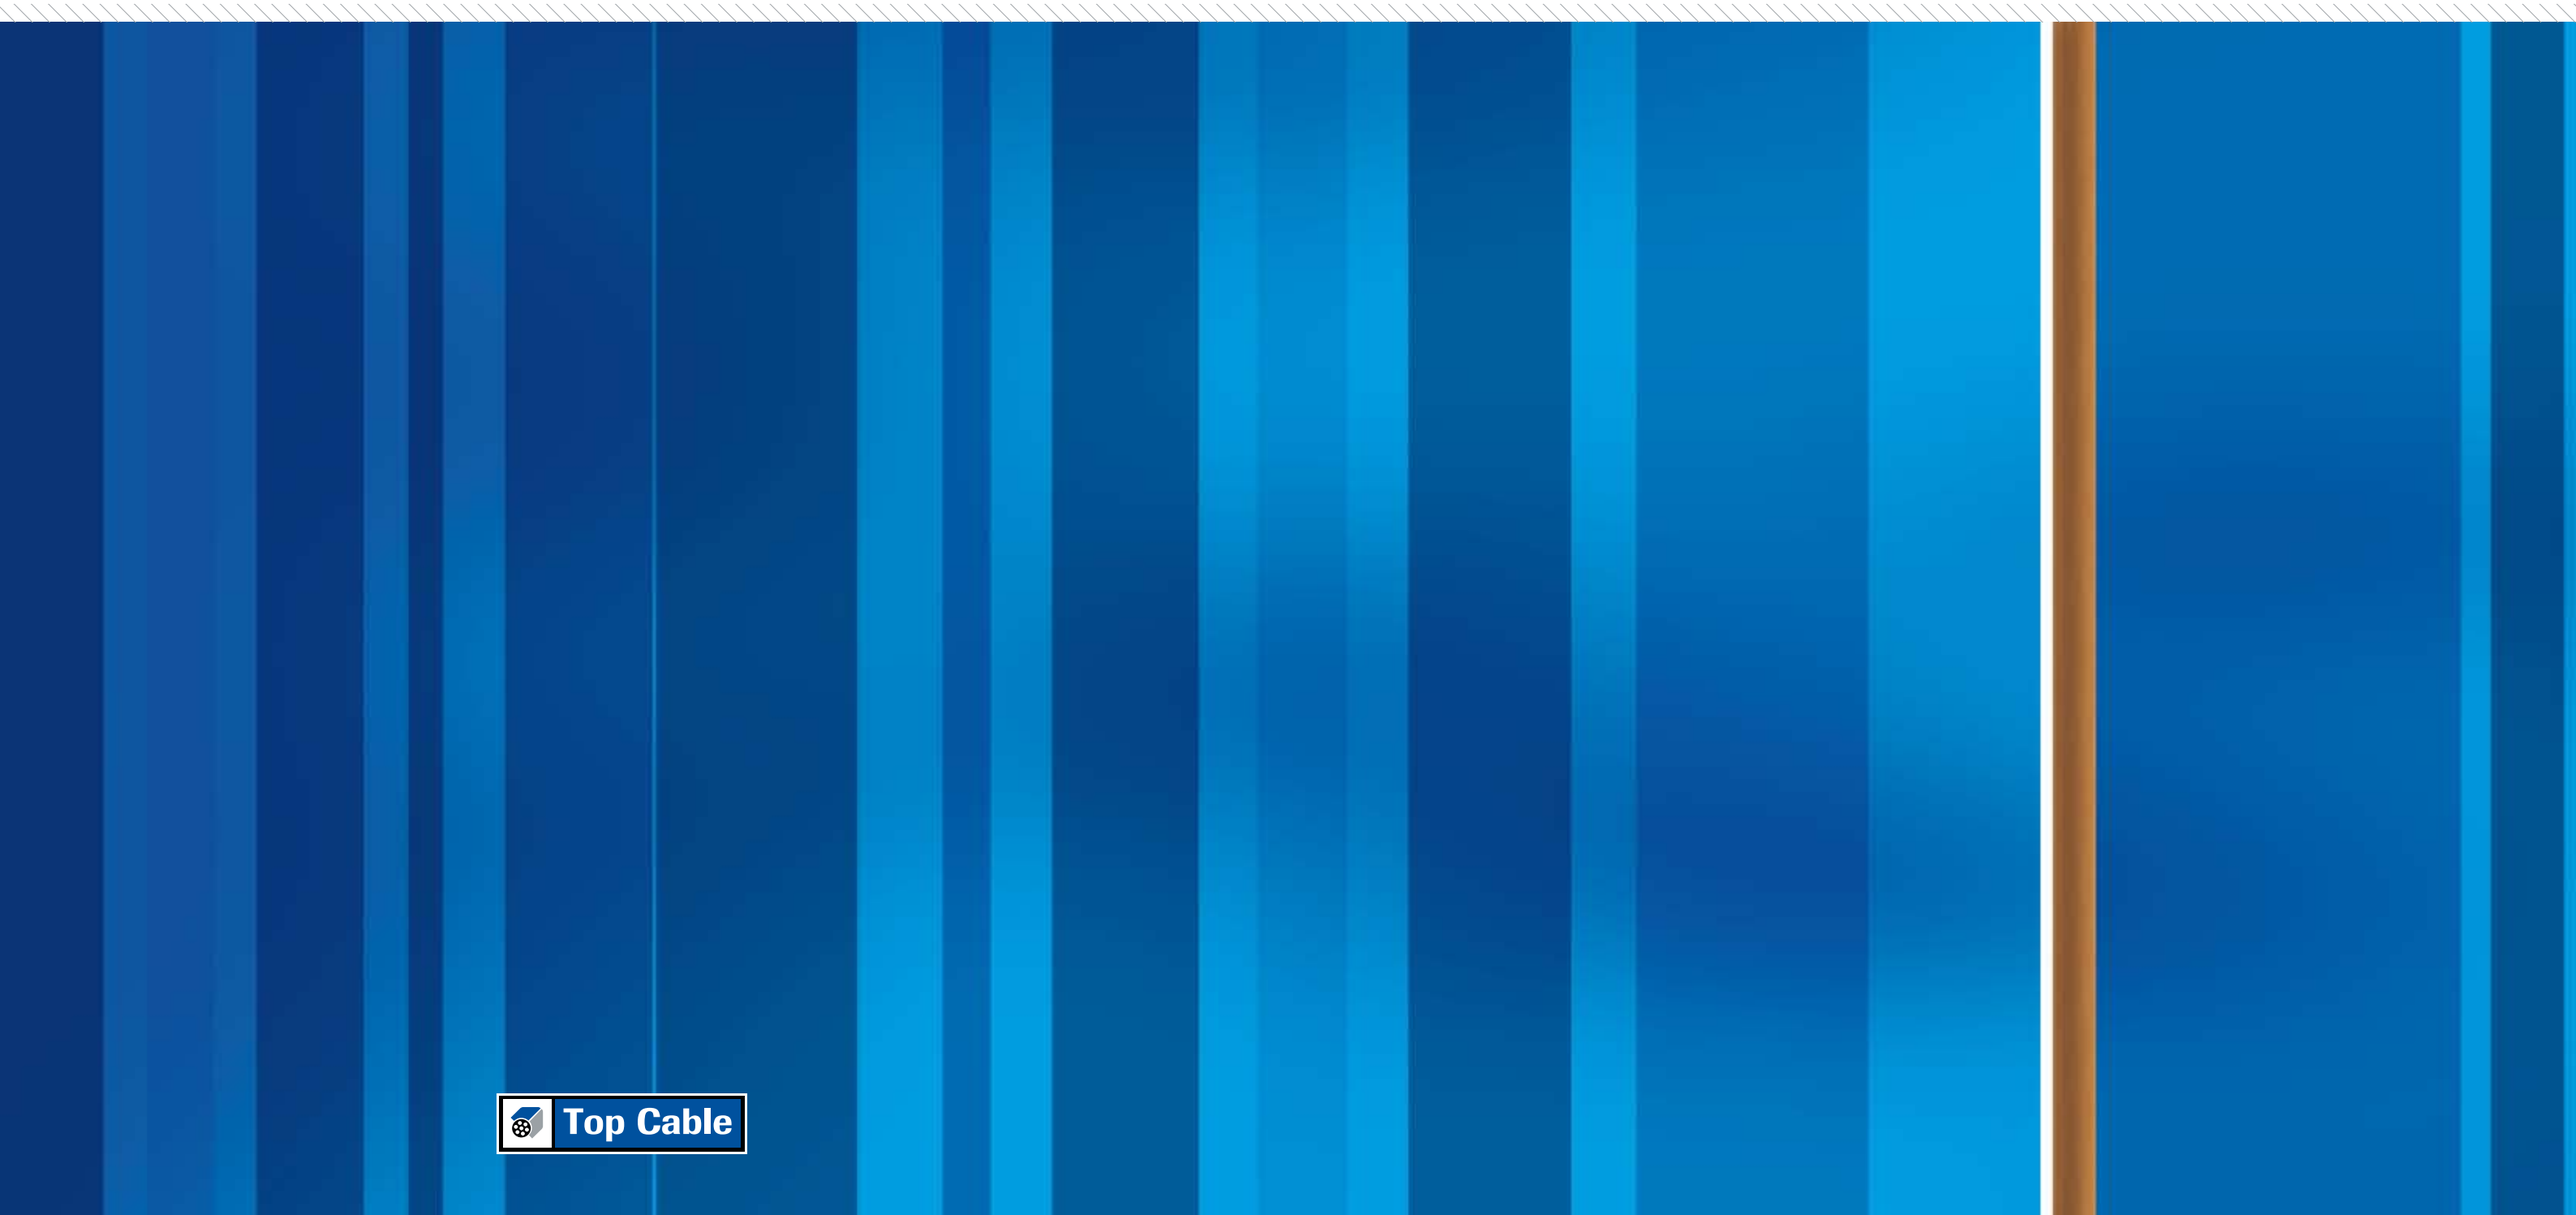

Table A.52.3 – Examples of methods of installation providing instructions for obtaining current-carrying capacity

Item No.	Methods of installation	Description	Reference method of installation to be used to obtain current-carrying capacity (see Annex B)
1		Insulated conductors or single-core cables in conduit in a thermally insulated wall[a, c]	A1
2		Multi-core cables in conduit in a thermally insulated wall[a, c]	A2
3		Multi-core cable direct in a thermally insulated wall[a, c]	A1
4		Insulated conductors or single-core cables in conduit on a wooden or masonry wall or spaced less than 0,3 × conduit diameter from it[c]	B1
5		Multi-core cable in conduit on a wooden or masonry wall or spaced less than 0,3 × conduit diameter from it [c]	B2
6 7		Insulated conductors or single-core cables in cable trunking (includes multi-compartment trunking) on a wooden or masonry wall – run horizontally[b] – run vertically[b, c]	B1
8 9		Multi-core cable in cable trunking (includes multi-compartment trunking) on a wooden or masonry wall – run horizontally[b] – run vertically[b, c]	Under consideration[d] Method B2 may be used

NOTE 1 The illustrations are not intended to depict actual product or installation practices but are indicative of the method described.

NOTE 2 All footnotes can be found on the last page of Table A.52.3.

Table A.52.3 (*continued*)

Item No	Methods of installation	Description	Reference method of installation to be used to obtain current-carrying capacity (see Annex B)
10		Insulated conductors or single-core cable in suspended cable trunking[b]	B1
11		Multi-core cable in suspended cable trunking[b]	B2
12		Insulated conductors or single-core cable run in mouldings[c, e]	A1
15		Insulated conductors in conduit or single-core or multi-core cable in architrave[c, f]	A1
16		Insulated conductors in conduit or single-core or multi-core cable in window frames[c, f]	A1
20		Single-core or multi-core cables: – fixed on, or spaced less than 0,3 × cable diameter from a wooden or masonry wall[c]	C
21		Single-core or multi-core cables: – fixed directly under a wooden or masonry ceiling	C, with item 3 of Table B.52.17
22		Single-core or multi-core cables: – spaced from a ceiling	Under consideration Method E may be used
23		Fixed installation of suspended current-using equipment	C, with item 3 of Table B.52.17

Table A.52.3 (*continued*)

Item No.	Methods of installation	Description	Reference method of installation to be used to obtain current-carrying capacity (see Annex B)
30		Single-core or multi-core cables: On unperforated tray run horizontally or vertically[c, h]	C with item 2 of Table B.52.17
31		Single-core or multi-core cables: On perforated tray run horizontally or vertically[c, h] NOTE Refer to B.52.6.2 for description	E or F
32		Single-core or multi-core cables: On brackets or on a wire mesh tray run horizontally or vertically[c, h]	E or F
33		Single-core or multi-core cables: Spaced more than 0,3 times cable diameter from a wall	E or F or method G[g]
34		Single-core or multi-core cables: On ladder [c]	E or F
35		Single-core or multi-core cable suspended from or incorporating a support wire or harness	E or F
36		Bare or insulated conductors on insulators	G

Table A.52.3 (*continued*)

Item No.	Methods of installation	Description	Reference method of installation to be used to obtain current-carrying capacity (see Annex B)
40		Single-core or multi-core cable in a building void[c, h, i]	1,5 $D_e \le V < 5\ D_e$ B2 5 $D_e \le V < 20\ D_e$ B1
41		Insulated conductor in conduit in a building void[c, i, j, k]	1,5 $D_e \le V < 20\ D_e$ B2 $V \ge 20\ D_e$ B1
42		Single-core or multi-core cable in conduit in a building void[c, k]	Under consideration The following may be used: 1,5 $D_e \le V < 20\ D_e$ B2 $V \ge 20\ D_e$ B1
43		Insulated conductors in cable ducting in a building void[c, i, j, k]	1,5 $D_e \le V < 20\ D_e$ B2 $V \ge 20\ D_e$ B1
44		Single-core or multi-core cable in cable ducting in a building void[c, k]	Under consideration The following may be used: 1,5 $D_e \le V < 20\ D_e$ B2 $V \ge 20\ D_e$ B1
45		Insulated conductors in cable ducting in masonry having a thermal resistivity not greater than 2 K·m/W[c, h, i]	1,5 $D_e \le V < 5\ D_e$ B2 5 $D_e \le V < 50\ D_e$ B1
46		Single-core or multi-core cable in cable ducting in masonry having a thermal resistivity not greater than 2 K·m/W[c]	Under consideration The following may be used 1,5 $D_e \le V < 20\ D_e$ B2 $V \ge 20\ D_e$ B1
47		Single-core or multi-core cable: – in a ceiling void – in a raised floor[h, i]	1,5 $D_e \le V < 5\ D_e$ B2 5 $D_e \le V < 50\ D_e$ B1

Table A.52.3 (*continued*)

Item No.	Methods of installation	Description	Reference method of installation to be used to obtain current-carrying capacity (see Annex B)
50		Insulated conductors or single-core cable in flush cable trunking in the floor	B1
51		Multi-core cable in flush cable trunking in the floor	B2
52		Insulated conductors or single-core cables in flush cable trunking[c]	B1
53		Multi-core cable in flush trunking[c]	B2
54		Insulated conductors or single-core cables in conduit in an unventilated cable channel run horizontally or vertically[c, i, l, n]	$1{,}5\ D_e \leq V < 20\ D_e$ B2 $V \geq 20\ D_e$ B1
55		Insulated conductors in conduit in an open or ventilated cable channel in the floor[m, n]	B1
56		Sheathed single-core or multi-core cable in an open or ventilated cable channel run horizontally or vertically[n]	B1
57		Single-core or multi-core cable direct in masonry having a thermal resistivity not greater than 2 K · m/W Without added mechanical protection[o, p]	C

Table A.52.3 (*continued*)

Item No.	Methods of installation	Description	Reference method of installation to be used to obtain current-carrying capacity (see Annex B)
58		Single-core or multi-core cable direct in masonry having a thermal resistivity not greater than 2 K · m/W With added mechanical protection[o, p]	C
59		Insulated conductors or single-core cables in conduit in masonry[p]	B1
60		Multi-core cables in conduit in masonry[p]	B2
70		Multi-core cable in conduit or in cable ducting in the ground	D1
71		Single-core cable in conduit or in cable ducting in the ground	D1
72		Sheathed single-core or multi-core cables direct in the ground – without added mechanical protection[q]	D2

Table A.52.3 (*continued*)

Item No.	Methods of installation	Description	Reference method of installation to be used to obtain current-carrying capacity (see Annex B)
73		Sheathed single-core or multi-core cables direct in the ground – with added mechanical protection[q]	D2

[a] The inner skin of the wall has a thermal conductance of not less than 10 $W/m^2 \cdot K$.

[b] Values given for installation methods B1 and B2 in Annex B are for a single circuit. Where there is more than one circuit in the trunking the group reduction factor given in Table B.52-17 is applicable, irrespective of the presence of an internal barrier or partition.

[c] Care shall be taken where the cable runs vertically and ventilation is restricted. The ambient temperature at the top of the vertical section can be increased considerably. The matter is under consideration.

[d] Values for reference method B2 may be used.

[e] The thermal resistivity of the enclosure is assumed to be poor because of the material of construction and possible air spaces. Where the construction is thermally equivalent to methods of installation 6 or 7, reference method B1 may be used.

[f] The thermal resistivity of the enclosure is assumed to be poor because of the material of construction and possible air spaces. Where the construction is thermally equivalent to methods of installation 6, 7, 8, or 9, reference methods B1 or B2 may be used.

[g] The factors in Table B.52.17 may also be used.

[h] D_e is the external diameter of a multi-core cable:
- 2,2 × the cable diameter when three single core cables are bound in trefoil, or
- 3 × the cable diameter when three single core cables are laid in flat formation.

[i] V is the smaller dimension or diameter of a masonry duct or void, or the vertical depth of a rectangular duct, floor or ceiling void or channel. The depth of the channel is more important than the width.

[j] D_e is the external diameter of conduit or vertical depth of cable ducting.

[l] D_e is the external diameter of the conduit.

[m] For multi-core cable installed in method 55, use current-carrying capacity for reference method B2.

[n] It is recommended that these methods of installation are used only in areas where access is restricted to authorized persons so that the reduction in current-carrying capacity and the fire hazard due to the accumulation of debris can be prevented.

[o] For cables having conductors not greater than 16 mm^2, the current-carrying capacity may be higher.

[p] Thermal resistivity of masonry is not greater than 2 K·m/W, the term "masonry" is taken to include brickwork, concrete, plaster and the like (other than thermally insulating materials).

[q] The inclusion of directly buried cables in this item is satisfactory when the soil thermal resistivity is of the order of 2,5 K·m/W. For lower soil resistivities, the current-carrying capacity for directly buried cables is appreciably higher than for cables in ducts.

Table B.52.1 – Installation reference methods forming basis of tabulated current-carrying capacities

Reference method of installation		Table and column						
		Current-carrying capacities for single circuits					Ambient temperature factor	Group reduction factor
		Thermoplastic insulated		Thermosetting insulated		Mineral insulated

NOTE 1 Circular conductors are assumed for sizes up to and including 16 mm². Values for larger sizes relate to shaped conductors and may safely be applied to circular conductors.

NOTE 2 D_e is the external diameter of the cable.

Table B.52.14 – Correction factor for ambient air temperatures other than 30 °C to be applied to the current-carrying capacities for cables in the air

Ambient temperature[a] °C	Insulation			
	PVC	XLPE and EPR	Mineral[a]	
			PVC covered or bare and exposed to touch 70 °C	Bare not exposed to touch 105 °C
10	1,22	1,15	1,26	1,14
15	1,17	1,12	1,20	1,11
20	1,12	1,08	1,14	1,07
25	1,06	1,04	1,07	1,04
30	1,00	1,00	1,00	1,00
35	0,94	0,96	0,93	0,96
40	0,87	0,91	0,85	0,92
45	0,79	0,87	0,78	0,88
50	0,71	0,82	0,67	0,84
55	0,61	0,76	0,57	0,80
60	0,50	0,71	0,45	0,75
65	–	0,65	–	0,70
70	–	0,58	–	0,65
75	–	0,50	–	0,60
80	–	0,41	–	0,54
85	–	–	–	0,47
90	–	–	–	0,40
95	–	–	–	0,32

[a] For higher ambient temperatures, consult the manufacturer.

Table B.52.15 – Correction factors for ambient ground temperatures other than 20 °C to be applied to the current-carrying capacities for cables in ducts in the ground

Ground temperature °C	Insulation	
	PVC	XLPE and EPR
10	1,10	1,07
15	1,05	1,04
20	1,00	1,00
25	0,95	0,96
30	0,89	0,93
35	0,84	0,89
40	0,77	0,85
45	0,71	0,80
50	0,63	0,76
55	0,55	0,71
60	0,45	0,65
65	–	0,60
70	–	0,53
75	–	0,46
80	–	0,38

Table B.52.16 – Correction factors for cables buried direct in the ground or in buried ducts for soil thermal resistivities other than 2,5 K·m/W to be applied to the current-carrying capacities for reference method D

Thermal resistivity, K·m/W	0,5	0,7	1	1,5	2	2,5	3
Correction factor for cables in buried ducts	1,28	1,20	1,18	1,1	1,05	1	0,96
Correction factor for direct buried cables	1,88	1,62	1,5	1,28	1,12	1	0,90

NOTE 1 The correction factors given have been averaged over the range of conductor sizes and types of installation included in Tables B.52.2 to B.52.5. The overall accuracy of correction factors is within ±5 %.

NOTE 2 The correction factors are applicable to cables drawn into buried ducts; for cables laid direct in the ground the correction factors for thermal resistivities less than 2,5 K·m/W will be higher. Where more precise values are required they may be calculated by methods given in the IEC 60287 series.

NOTE 3 The correction factors are applicable to ducts buried at depths of up to 0,8 m.

NOTE 4 It is assumed that the soil properties are uniform. No allowance had been made for the possibility of moisture migration which can lead to a region of high thermal resistivity around the cable. If partial drying out of the soil is foreseen, the permissible current rating should be derived by the methods specified in the IEC 60287 series.

Table B.52.17 – Reduction factors for one circuit or one multi-core cable or for a group of more than one circuit, or more than one multi-core cable, to be used with current-carrying capacities of Tables B.52.2 to B.52.13

Item	Arrangement (cables touching)	Number of circuits or multi-core cables												To be used with current-carrying capacities, reference
		1	2	3	4	5	6	7	8	9	12	16	20	
1	Bunched in air, on a surface, embedded or enclosed	1,00	0,80	0,70	0,65	0,60	0,57	0,54	0,52	0,50	0,45	0,41	0,38	B.52.2 to B.52.13 Methods A to F
2	Single layer on wall, floor or unperforated cable tray systems	1,00	0,85	0,79	0,75	0,73	0,72	0,72	0,71	0,70	No further reduction factor for more than nine circuits or multicore cables			B.52.2 to B.52.7 Method C
3	Single layer fixed directly under a wooden ceiling	0,95	0,81	0,72	0,68	0,66	0,64	0,63	0,62	0,61				
4	Single layer on a perforated horizontal or vertical cable tray systems	1,00	0,88	0,82	0,77	0,75	0,73	0,73	0,72	0,72				B.52.8 to B.52.13 Methods E and F
5	Single layer on cable ladder systems or cleats etc.,	1,00	0,87	0,82	0,80	0,80	0,79	0,79	0,78	0,78				

NOTE 1 These factors are applicable to uniform groups of cables, equally loaded.

NOTE 2 Where horizontal clearances between adjacent cables exceeds twice their overall diameter, no reduction factor need be applied.

NOTE 3 The same factors are applied to:
- groups of two or three single-core cables;
- multi-core cables.

NOTE 4 If a system consists of both two- and three-core cables, the total number of cables is taken as the number of circuits, and the corresponding factor is applied to the tables for two loaded conductors for the two-core cables, and to the tables for three loaded conductors for the three-core cables.

NOTE 5 If a group consists of *n* single-core cables it may either be considered as *n*/2 circuits of two loaded conductors or *n*/3 circuits of three loaded conductors.

NOTE 6 The values given have been averaged over the range of conductor sizes and types of installation included in Tables B.52.2 to B.52.13 the overall accuracy of tabulated values is within 5 %.

NOTE 7 For some installations and for other methods not provided for in the above table, it may be appropriate to use factors calculated for specific cases, see for example Tables B.52.20 and B.52.21.

CURRENT-CARRYING CAPACITIES

Table B.52.18 – Reduction factors for more than one circuit, cables laid directly in the ground – Installation method D2 in Tables B.52.2 to B.52.5 – Single-core or multi-core cables

Number of circuits	Cable to cable clearance*				
	Nil (cables touching)	One cable diameter	0,125 m	0,25 m	0,5 m
2	0,75	0,80	0,85	0,90	0,90
3	0,65	0,70	0,75	0,80	0,85
4	0,60	0,60	0,70	0,75	0,80
5	0,55	0,55	0,65	0,70	0,80
6	0,50	0,55	0,60	0,70	0,80
7	0,45	0,51	0,59	0,67	0,76
8	0,43	0,48	0,57	0,65	0,75
9	0,41	0,46	0,55	0,63	0,74
12	0,36	0,42	0,51	0,59	0,71
16	0,32	0,38	0,47	0,56	0,38
20	0,29	0,35	0,44	0,53	0,66

* Multi-core cables

* Single-core cables

NOTE 1 Values given apply to an installation depth of 0,7 m and a soil thermal resistivity of 2,5 K·m/W. They are average values for the range of cable sizes and types quoted for Tables B.52.2 to B.52.5. The process of averaging, together with rounding off, can result in some cases in errors up to ±10 %. (Where more precise values are required they may be calculated by methods given in IEC 60287-2-1.)

NOTE 2 In case of a thermal resistivity lower than 2,5 K·m/W the corrections factors can, in general, be increased and can be calculated by the methods given in IEC 60287-2-1.

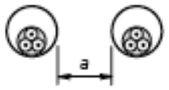
NOTE 3 If a circuit consists of *m* parallel conductors per phase, then for determining the reduction factor, this circuit should be considered as *m* circuits.

Table B.52.19 – Reduction factors for more than one circuit, cables laid in ducts in the ground – Installation method D1 in Tables B.52.2 to B.52.5

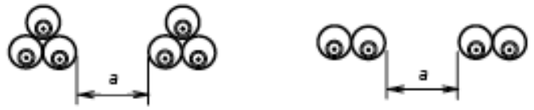
A) Multi-core cables in single-way ducts				
Number of cables	Duct to duct clearance[a]			
	Nil (ducts touching)	0,25 m	0,5 m	1,0 m
2	0,85	0,90	0,95	0,95
3	0,75	0,85	0,90	0,95
4	0,70	0,80	0,85	0,90
5	0,65	0,80	0,85	0,90
6	0,60	0,80	0,80	0,90
7	0,57	0,76	0,80	0,88
8	0,54	0,74	0,78	0,88
9	0,52	0,73	0,77	0,87
10	0,49	0,72	0,76	0,86
11	0,47	0,70	0,75	0,86
12	0,45	0,69	0,74	0,85
13	0,44	0,68	0,73	0,85
14	0,42	0,68	0,72	0,84
15	0,41	0,67	0,72	0,84
16	0,39	0,66	0,71	0,83
17	0,38	0,65	0,70	0,83
18	0,37	0,65	0,70	0,83
19	0,35	0,64	0,69	0,82
20	0,34	0,63	0,68	0,82

B) Single-core cables in non-magnetic single-way ducts				
Number of single-core circuits of two or three cables	Duct to duct clearance[b]			
	Nil (ducts touching)	0,25 m	0,5 m	1,0 m
2	0,80	0,90	0,90	0,95
3	0,70	0,80	0,85	0,90
4	0,65	0,75	0,80	0,90
5	0,60	0,70	0,80	0,90
6	0,60	0,70	0,80	0,90
7	0,53	0,66	0,76	0,87
8	0,50	0,63	0,74	0,87
9	0,47	0,61	0,73	0,86
10	0,45	0,59	0,72	0,85
11	0,43	0,57	0,70	0,85
12	0,41	0,56	0,69	0,84
13	0,39	0,54	0,68	0,84
14	0,37	0,53	0,68	0,83
15	0,35	0,52	0,67	0,83
16	0,34	0,51	0,66	0,83
17	0,33	0,50	0,65	0,82
18	0,31	0,49	0,65	0,82
19	0,30	0,48	0,64	0,82
20	0,29	0,47	0,63	0,81

[a] Multi-core cables



[b] Single-core cables



NOTE 1 Values given apply to an installation depth of 0,7 m and a soil thermal resistivity of 2,5 K·m/W. They are average values for the range of cable sizes and types quoted for Tables B.52.2 to B.52.5. The process of averaging, together with rounding off, can result in some cases in errors up to ±10 %. Where more precise values are required they may be calculated by methods given in the IEC 60287series.

NOTE 2 In case of a thermal resistivity lower than 2,5 K·m/W the corrections factors can, in general, be increased and can be calculated by the methods given in IEC 60287-2-1.

NOTE 3 If a circuit consists of *n* parallel conductors per phase, then for determining the reduction factor this circuit shall be considered as *n* circuits.
